Career Interest Profiler

START ASSESSMENT

The **Career Interest Profiler** captures your interests to help identify your personality traits and suggests careers based on the U.S. Department of Labor's data.

How it Works

Plan to spend at least 15 minutes on this assessment.

You'll answer 60 questions about your interests.

The **Career Interest Profiler** then maps your results to Holland's 6 personality traits.

Naviance then shows you careers that map to your traits and educational aspirations.

What's in it for you

You'll learn your personality traits according to the Holland Code and how those help with career exploration and planning.

You'll inform your career planning process with career recommendations based on your personality.

Teachers and counselors will understand you and careers that might be a good fit for you.

Summary

The Career Interest Profiler helps you find careers by mapping your interests to six basic types of personalities, together called the Holland Code. The higher you score, the more you are like that type.

What's Next

Take a look at the traits where you received your **highest scores** and then view the related careers for those types.

Consider your education and training aspirations. You have to level up your skills to break into any occupation. Different careers require different certification, licenses, and degrees. These can take anywhere from a few months to over 5 years. Filter related careers by education to find careers that match your needs.

You are unique. Not every career that matches a personality type will be a match to your interests, skills, aspirations, or desired lifestyle. The trick is to discover the ones that do.

Be sure to **favorite careers** that interest you to save them for later.

Career Interest Profiler

Introduction

You are about to begin the Career Interest Profiler, a tool that can help you discover the types of work activities and careers that match your interests. The interest profiler has 180 questions about work activities that people do at their jobs.

When choosing your answers, think about whether you would like or dislike doing a particular work activity if you had a chance to do it. Try not to think about whether you have enough education or training to perform the activity.

This is not a test. There are no right or wrong answers. The more accurately you answer each question, though, the better your results will be. If you need to leave the profiler in the middle and return later, remember to complete all the answers in the page you are on and click the "Next" button. When you return to this section, you will pick up where you left off.

When you are ready to begin, please click the "Start" button below.
