

We are here to talk about how students should achieve their goal during difficult economic time.

In order for student to improve their achievement we thing that the Montgomery board of education should provide after school clubs that have fun learning activities. Teacher's should motivate student to work hard no matter what, they should also keep a close eye on inattentive student to make sure they did what they were suppose to do .student should have a study partner in case that if they were absent they could ask question about the class. Parents should always check on their children to make sure their homework is done. Teachers should give incentive to students. Make free homework helps available on line for students in need. The government should review the scholarship requirement and make it more flexible so that much more students especially from poor families can benefit it and be able to attend college. Parents should maintain permanent contact with teachers and the school to follow up the performance of the child. Students should know that studying is their number one priority.
