MEMORANDUM

To: SERT Team Members

From: Hillary Kirchman, SERT Program Manager

Subject: SERT Patrol Activity – Energy and Recycling

In an effort to increase energy savings and recycling rates throughout all schools the School Energy and Recycling Team has added recycling checkpoints to the elementary patrol activity. When the students are patrolling the school for energy efficiency, please encourage them to check for recycling bins and active recycling in the classrooms, team rooms, offices, etc.

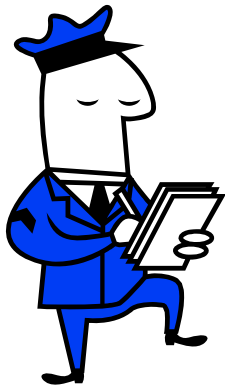

The data collected along with the notices and awards can be used to provide weekly or monthly recognition to classrooms that are a leading example of energy efficiency and recycling. Feel free to use the prepared Certificates of Achievement to the classrooms with consistent positive energy and recycling data as collected by your SERT students.

We hope this activity provides your students with an opportunity to “own” their program and contribute to the culture of conservation we actively strive to achieve.

If you are looking for additional resources and activities to participate in with your students, please visit our website <http://www.montgomeryschoolsmd.org/departments/facilities/greenschoolsfocus/sert.shtm> or contact our office at 240-314-1090, for assistance.

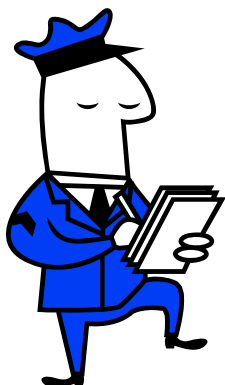

We have added a new recycling resource page to our website www.montgomeryschoolsmd.org/departments/facilities/greenschoolsfocus/recycling.html.

Thank you for actively participating in SERT.

Super Recycling Award!
SERT appreciates your efforts and recognizes you for superior recycling efforts.

Do you need help with recycling?
Contact your SERT Leader to ask for help with your recycling. We noticed that your room does not have recycling bins or they are not being used.
