Jim_Stufft@mcpsmd.org

I started my career with MCPS 33 years ago when the first Apple Computer went on sale, Jimmy Carter was president, and gasoline was 65 cents a gallon! Also, I attended MCPS schools and graduated from Sherwood High School in 1976. Much has changed in 33 years, however, my focus and dedication to the students and staff of MCPS concerning environmental issues has remained the same. For 25 years I worked at the L.E. Smith Environmental Education Center, supporting and enhancing the educational program for the students who participated in the various programs the Smith Center offered. In 2005 I joined the SERT program to help our schools save energy, recycle and conserve our natural resources.

On a personal note, I enjoy spending time with my family and friends. I take pleasure in gardening and working on home improvement projects. I also enjoy hiking, bicycling, camping, and reading. And finally...Go REDSKINS!
