

## **SERT Champion Pamela Jackson, Sargent Shriver Elementary School**

Sargent Shriver Elementary School, one of our newest schools, is fortunate to have Ms. Pamela Jackson as their building service manager. The facility is competently maintained by Ms. Jackson whose persistent drive and commitment to excellence results in an efficient and healthy school environment.

Ms. Jackson leads by example—a great role model for her peers and the students. She uses a task lamp on her desk instead of turning on the overhead lighting; she turns her computer off in her office when it's not in use. Her persistence and attention to detail makes her a SERT Champion. Ms. Jackson spends time training her staff in SERT energy conservation strategies. She reminds her staff and building occupants to shut off lights in unoccupied areas, shut down computers when not in use, close doors and windows when heating and cooling systems are running, and to adjust the blinds to manage natural day lighting and solar heat gain.

Managing a facilities energy conservation effort requires proactive and persistent day-to-day involvement. Thanks to the efforts of Ms. Jackson and her team, Shriver ES is making a difference.
