

School Energy and Recycling Team (SERT) Program

What can we do with our SERT funds?

If you are looking for ideas to spend some of your SERT funds to encourage energy savings, consider the following:

- Ask your principal to purchase stipend hours for your SERT team leader.
- Purchase task lamps for areas where overhead lighting is unnecessary.
- Sponsor field trips where students can learn about alternative energy and the impact of energy on our environment
- Purchase Watt meters for students to use in your school to conduct building audits.
- Host a pizza/ice cream party to celebrate the achievements of your active SERT team.
- Design and purchase SERT t-shirts, aprons, visors, hats, buttons, lanyards, pencils, rulers, etc.
- Purchase recycling bins through FMS to make recycling more available in areas of your school that lack bins.
- Purchase a camera for the SERT team to take pictures of great conservation in action—use these pictures to highlight the actions.
