New Dumpsters are on their way...

Please help SERT coordinate this transition...

MCPS is in the process of changing recycling haulers from Waste Management to Potomac Disposal. Waste Management will remove dumpsters by June 30. New dumpster deliveries will take place from June 9 through June 30. Your assistance is needed to make this a smooth transition. Please review the following information and ensure that the required actions are taken. There may be a double set of dumpsters at your school for a short period of time as this transition is being made.

ACTIONS REQUIRED

Phase 1:

- Identify the location you would like the new dumpster to be placed by putting an orange traffic cone and/or spray paint a "D" in the parking area. This will be the location where the new dumpsters will be temporarily placed until the old dumpsters are removed.
- Continue to use Waste Management dumpsters until Wednesday, June 30, 2010.
- If Waste Management dumpsters are removed from your school prior to June 30, then you may begin using the new Potomac Disposal dumpsters.

Phase 2:

- During the week of June 21, 2010, please remove all dumpster locks from Waste Management dumpsters. These should be used on the new Potomac Disposal dumpsters.
- If your school has Waste Management totes, please make sure that all totes from your building are placed at the loading dock area for pick up. (New totes will be delivered.)

Phase 3:

- After Waste Management dumpsters are removed from your school, SERT will coordinate a schedule to move the new dumpsters in place.

SERT would like to thank you in advance for your understanding and cooperation during this transition period.

If you have any questions or concerns please contact the SERT office @ 240-314-1090
