

Lock It Or Lose it..'

Help protect our recyclables – we do not want to lose them.

You can order locks now through MAXIMO.

Remember:

- MCPS requires that all dumpsters for recyclable materials be locked at all times except when in use by building services.
- Recycling contamination occurs when dumpsters are unlocked.
- Dumpsters do not need to be unlocked on the day of pick-up.
- Schools will not be eligible for recycling rewards if dumpsters are found unlocked.

Did you know that if a school dumpster is contaminated with trash and the recycling goes into the truck, MCPS could lose up to 5 tons in recycled material from approximately 30 schools? It just takes one contaminated dumpster to ruin an entire truckload of recyclables – please keep them locked...
