

TI-83 AND TI-83 PLUS CALCULATOR REPAIRS

Calculator Repair Tips

Before you submit a request for calculator repairs, these hints may help you fix them yourself! Repairing your own calculator saves time and money; not to mention the satisfaction of a job well done! Simply follow these steps and you may discover the problem and how to fix it! If you still have problems, [click here](#) to complete a calculator repair form and we'll be happy to help you!

- 1) First, turn on the calculator to make sure that it has power.
- 2) If you turn it on and the screen is blank or all black, adjust the contrast to make the screen lighter or darker and see if this resolves the problem.
- 3) Replace the batteries if the screen is still blank after adjusting the contrast. You will need four AAA batteries. (Warehouse item #: 0611705)
- 4) If the screen is still blank or all black, [click here](#) to complete a calculator repair form. Or, [click here](#) if you'd like to attempt further repair tips and instructions.
