

Office of Shared Accountability
MONTGOMERY COUNTY PUBLIC SCHOOLS
Rockville, Maryland

September 8, 2008

To: Elementary School Principals

From: Stacy L. Scott, Associate Superintendent, Office of Shared Accountability

Subject: Performance of Montgomery County Public Schools Grade 2 Students on the 2008 *TerraNova* Second Edition

Performance of Grade 2 students in the Montgomery County Public Schools (MCPS) climbed to new highs in 2008, with more than 72 percent of test takers attaining composite scores on the 2008 *TerraNova* Second Edition (TN/2) that were at or above the national average (Table 1). Particularly noteworthy in 2008 was the performance of African American and Hispanic students, who demonstrated one-year improvements that were nearly three times greater than those of Asian American and White students. The progress shown by Grade 2 African American and Hispanic students on the 2008 TN/2 provides evidence that MCPS is narrowing the achievement gap by race/ethnicity at the primary level even as it improves performance for all student groups.

Table 1
Percentage of MCPS Grade 2 Students with Spring 2007 and 2008 TN/2 Scores At or Above the 50th Normal Curve Equivalent (NCE) by Test Year and Racial/Ethnic Group

Demographic Group	% Students with Composite Scores ^a at or Above the 50 th NCE ^b		One-Year Percentage Point Change
	2007	2008	
All MCPS	69.2	72.2	+3.0
African American	50.8	56.0	+5.2
Asian American	83.8	85.6	+1.8
Hispanic	48.0	53.3	+5.3
White	84.8	86.3	+1.4

Note. Difference scores are calculated from rounded mean scores and may differ by 0.1 percentage point from differences shown in the Appendix that are calculated on the unrounded mean scores.

^a The composite score is the average of the NCE scores for the reading, language, and mathematics subtests.

^b The 50th NCE is equivalent to the 50th national percentile rank. Unlike percentile ranks, the NCE is a metric that can be used to measure students' academic growth over time.

More than one half of Grade 2 African American (56.0 percent) and Hispanic (53.3 percent) students had composite scores that met or exceeded the national average for all Grade 2 students,

rates that were 5.2 and 5.3 percentage points greater, respectively, than in 2007 (Table 1). For the first time, more than one half of Grade 2 African American and Hispanic students scored at or above the 50th NCE on all TN/2 subtests, including reading, language, mathematics, language mechanics, and mathematics computation (Attachment).

More than 85 percent of Grade 2 Asian American (85.6 percent) and White (86.3 percent) students' composite scores met or exceeded the national average for all Grade 2 students, rates that were 1.8 and 1.4 percentage points greater, respectively, than in 2007. On most subtests, more than 80 percent of Asian American and White students scored at or above the 50th NCE, rates that were slightly higher than those observed in 2007.

In 2008, the one-year improvements in TN/2 performance among students who received Free and Reduced-price Meals System (FARMS), special education, and English language learner (ELL) services exceeded the district average for all students (Table 2). Nearly one half of students who received FARMS services (48.9 percent) attained composite scores at or above the 50th NCE, a gain of 5.6 percentage points compared with 2007. In addition to showing improvement in their composite scores, test takers who received FARMS services performed better on all TN/2 subtests in 2008 than in 2007 (Attachment).

Table 2
Percentage of MCPS Grade 2 Students with Spring 2007 and 2008 TN/2
Scores At or Above the 50th Normal Curve Equivalent (NCE)^a
by Test Year and Service Group

Demographic Group	% Students with Composite Scores ^b at or Above the 50 th NCE		One-Year Percentage Point Change
	2007	2008	
All MCPS	69.2	72.2	+3.0
FARMS	43.3	48.9	+5.6
Special Education	36.6	39.8	+3.2
ELL	34.0	43.1	+9.1

^a The 50th NCE is equivalent to the 50th national percentile rank. Unlike percentile ranks, the NCE is a metric that can be used to measure students' academic growth over time.

^b The composite score is the average of the NCE scores for the reading, language, and mathematics subtests.

More than one third of test takers who received special education (39.8 percent) and ELL (43.1 percent) services attained composite scores at or above the 50th NCE. Although these percentages are still below the national average for all students, the one-year improvements for test takers who received special education and ELL services were 3.2 and 9.1 percentage points, respectively. In addition to showing improvement in their composite scores, test takers who received special education and ELL services performed better on most of the TN/2 subtests in 2008 than in 2007 (Attachment).

Another encouraging result is demonstrated by the improvement of students who attend "red zone" schools whose populations are impacted by high levels of poverty, mobility, and limited English proficiency (Attachment). On average, Grade 2 TN/2 performance in both red zone and "green zone" schools improved between 2007 and 2008. However, in 2008, the average improvement in composite score performance in red zone schools was nearly three times greater

than in green zone schools (Table 3). In addition to showing improvement in their composite scores, test takers in red zone schools showed greater rates of improvement than green zone schools on all TN/2 subtests (Attachment). These findings provide additional evidence that MCPS increased attention to the performance of students in red zone elementary schools is working to both raise achievement levels of all students and narrow racial/ethnic achievement gaps.

Table 3
Percentage of MCPS Grade 2 Students with Spring 2007 and 2008 TN/2
Scores At or Above the 50th Normal Curve Equivalent (NCE)
by Test Year and School Zone

Demographic Group	% Students with Composite Scores ^a at or Above the 50 th NCE ^a		One-Year Percentage Point Change
	2007	2008	
All MCPS	69.2	72.2	+3.0
Red Zone	56.3	61.2	+4.9
Green Zone	79.9	81.7	+1.8

^a The 50th NCE is equivalent to the 50th national percentile rank. Unlike percentile ranks, the NCE is a metric that can be used to measure students' academic growth over time.

^b The composite score is the average of the NCE scores for the reading, language, and mathematics subtests.

While there are differences in student achievement by race/ethnicity and for students receiving special services, this year's TN/2 results continue to reflect the sustained progress MCPS is making in the realization of rigorous academic standards and building the foundation of success for all students. The attached tables present TN/2 results by student group, school zone, and elementary school.

You can view the 2007 and 2008 TN/2 results for students who are currently enrolled in your school using Data Warehouse reports available at: <https://mcpsportal.mcpsmd.org>. To link to the results, follow the pathway: Public Folders > Data Warehouse Reporting > Student Performance > TerraNova 2 > TerraNova 2 Form D. If you would like additional information, please contact Dr. Clare Von Secker, supervisor, Applied Research Unit, Office of Shared Accountability, at 301-279-3541, or by e-mail at Clare_E_VonSecker@mcpsmd.org.

Note. American Indian students are included with all students but are not reported separately.

^a Nationally, 50% of students score at or above the 50th NCE.

^b The composite score is the average of the NCE scores for the reading, language, and mathematics tests. Composite scores are reported only for students with reading, language, and mathematics subtest scores. Scores are reported for students who received accommodations even though such accommodations may invalidate norm-referenced test results.

^a Nationally, 50% of students score at or above the 50th NCE.

^b The composite score is the average of the NCE scores for the reading, language, and mathematics tests. Composite scores are reported only for students with reading, language, and mathematics subtest scores. Scores are reported for students who received accommodations even though such accommodations may invalidate norm-referenced test results.

^a The composite score is the average of the NCE scores for the reading, language, and mathematics tests. Composite scores are reported only for students with reading, language, and mathematics subtest scores. Scores are reported for students who received accommodations even though such accommodations may invalidate norm-referenced test results.

^b Nationally, 50% of students score at or above the 50th NCE.

Note: NCE scores are not reported (n/r) for groups with fewer than 5 test takers. Data are not reported separately for American Indian students.

Note: Data are not reported separately for American Indian students. Difference scores are calculated from unrounded mean scores and may differ by 0.1 percentage point from differences calculated from the rounded mean scores shown in the tables. NCE scores are not reported (n/r) for groups with fewer than 5 test takers.

^a The composite score is the average of the NCE scores for the reading, language, and mathematics tests. Composite scores are reported only for students with reading, language, and mathematics subtest scores. Scores are reported for students who received accommodations even though such accommodations may invalidate norm-referenced test results.

^b Nationally, 50% of students score at or above the 50th NCE.

Note: Data are not reported separately for American Indian students. Difference scores are calculated from unrounded mean scores and may differ by 0.1 percentage point from differences calculated from the rounded mean scores shown in the tables. NCE scores are not reported (n/r) for groups with fewer than 5 test takers.

^a The composite score is the average of the NCE scores for the reading, language, and mathematics tests. Composite scores are reported only for students with reading, language, and mathematics subtest scores. Scores are reported for students who received accommodations even though such accommodations may invalidate norm-referenced test results.

^b Nationally, 50% of students score at or above the 50th NCE.
