

Green Team

School Name: Blake High School

School Year: 2006- 2007

Number of People for Project: 3

Suggested Time: 30 minutes

- Choose 3 people
- Those three people will go down to the Janitor Hallway, next to the elevator in B hall and pick up the blue rolling recycling bin.
- Pick a floor to do for the day: (either first floor on Monday and second floor on Tuesday or first floor Monday and Wednesday and Second floor Tuesday and Thursday).
- The students should go to each classroom on the floor and collect the blue recycling bin, empty it in the rolling recycling bin and return it to the classroom.
- If a classroom does not have a blue recycling bin go to building services to get a bin and make sure that it has a recycling sticker on it.
- Try to keep all non-paper products out of the rolling recycling bin. Although we have never implemented a plan for the bottles and cans it would be a good idea to take another recycling bin around with you to collect the cans and bottles.
- After doing all of the classrooms return the full rolling recycling bin to the Janitor hall way and leave it were you found it.
- Providing incentives such as candy to do green team may also be a good way to get people to volunteer to do green team

The Green team is designed to help are schools county rating for cleanliness. After the first rating we received a D for recycling and after we implemented Green team the rating went up to a C and was said to be going up.
