

Edline Message for the Clemente Home Page 2008-2009

Edline is a Web-based classroom-to-home communication system available through the Internet requiring a valid user name and password to access student information. Student achievement information, such as individual assignment and assessment (class quizzes and tests) scores and current course averages are available for each class.

Parents and students will have separate Edline accounts. Parent accounts can be linked to each enrolled student. Once users (students, parents, and teachers) receive an activation code, they will establish their own user id and password.

Parent of students enrolled as of August 14, 2008 will be sent their Parent Edline activation code via US Postal Service on/about August 26, 2008 by MCPS central office.

Parents of students enrolled after August 14, 2008 can contact the Edline Administrator via e-mail at Pam_G_Lloyd@mcpsmd.org to obtain the parent activation code.

New sixth, seventh, and eighth grade students will begin to activate their Edline accounts during the second and third weeks of school.
