

The Six Stages of AGOPPE

A	<u>Ask Questions:</u> Identify the problem, brainstorm about the topic, access and assess relevant background knowledge, identify broader questions related to the problem, identify smaller questions needed to clarify the big problem
G	<u>Gather Information:</u> Brainstorm possible sources, identify key words or phrases, evaluate effectiveness of the sources, skim to find relevant information, read selected passages relevant to the question, record notes, record bibliographic information

O

Organize Information: Analyze, interpret and evaluate notes, organize notes as they relate to the identified questions, create a graphic organizer to display relevant information, identify whether or not additional information is needed, return to step G if necessary

P

Prepare/Produce Information: Identify the format expectations for the product to be presented, create a rough draft, revise and edit for content, create a proof draft, revise and edit for mechanics, publish according to rubric expectations

P

Present Information: Present the product to the appropriate audience, rubric created for this product is used to assess content, format, mechanics and/or style

E

Evaluate Your Work and the Process: Evaluate your final product/presentation based on rubrics, write/reflect on the research process
