

Montgomery County Public Schools (MCPS) is scheduled to begin a feasibility study for Tilden Middle School/Rock Terrace School revitalization/expansion project in your neighborhood. The purpose of this study is to develop conceptual design options for the Tilden Middle School/Rock Terrace School revitalization/expansion. The study will address several issues including spatial relationships within the schools' interior, the pedestrian and traffic flow of the site, an environmental assessment, and how the proposed project will impact the community at large.

This notice is to inform you of the feasibility study work session schedule for the revitalization/ expansion project. MCPS extends an invitation to you to participate in this process. While all are invited, the community is encouraged to send representatives from their respective streets, areas, and associations. Everyone present will have the opportunity to hear about the study process for the proposed project.

The principals of the schools, design architects, MCPS staff from the Department of Facilities Management, government agencies, and representatives of the schools will participate in the feasibility study process. PTA members, parents, and neighbors are strongly encouraged to attend and participate.

The revised dates and times for the work sessions are shown on the opposite side of this mailing. The work sessions are scheduled in the afternoons and evenings to allow for maximum community and school staff involvement.

Sign language interpreter services will be provided upon request with notice as far in advance as possible but no less than 5 business days prior to the event. If you need this or other services or aids to participate in this activity, please call Joe DeRosa, project manager (PM) at 301-674-5211 voice; TTY users should call Maryland Relay (711) or email at [joseph\\_derosa@mcpsmd.org](mailto:joseph_derosa@mcpsmd.org). Taking these steps will help us have sufficient time to best meet your needs. Thank you.
