Converting Video Files using Zamzar.com

Zamzar.com is a free website that allows you to convert files from one format to another.

Why do I need this?

Sometimes you want to import a file – such as a picture or video – into a program that doesn't support the file type. For example, many cameras store video in AVI format, but Clicker 5 supports MPEG format instead. You can use Zamzar to *convert an AVI video to a WMV video* and then use it in a Clicker 5 resource.

1. Go to Zamzar.com

Open Internet explorer (or another browser) Type zamzar.com in the address bar Press ENTER

Convert Files Download Videos Manage Files				
	Step 1	Step 2	Step 3	Step 4
	Select files or <u>URL</u> to convert (up to 100MB - <u>want more</u> ?)	Choose the format to convert to:	Enter your email address to receive converted files:	Convert (by clicking you agree to our <u>Terms</u>)
	Browse	Convert file(s) to:		Convert

2. Choose the file you want to convert

- Under Step 1, click the BROWSE button
- Navigate to the video file that you need to convert
- Select the file and then click OPEN
- The name of your file will appear below, where it says "Files to Convert"

You are only permitted one file at a time in the free version of Zamzar

3. Choose the file format

- Under Step 2, choose the file format in the dropdown list
- To convert a video to a format that Clicker can use, choose WMV format

4. Enter your email address

- Under step 3, enter a valid email address
- Click the CONVERT button
- Wait for the file to upload. You'll see a progress bar showing how long it will take
- 5. Wait for an email

6. Download the file from your email

- When the email arrives, it will contain a special link back to the Zamzar website
- Make sure you are aware of where your browser saves your downloads and click the DOWNLOAD button
- Personal inbox to manage and store up to 100GB of your files
 No intrusive adverts
 And much more ...
