INFORMATION AND PROCEDURES

- 1. No medication will be administered in school or during school-sponsored activities without the parent's/guardian's written authorization and a written authorized prescriber order. This includes both prescription and over-the-counter (OTC) medications.
- 2. MCPS Form 525-13, *Authorization to Administer Prescribed Medication, Release and Indemnification Agreement* must be completed for medication administration in school and MCPS Form 525-14, *Emergency Care for the Management of a Student with a Diagnosis of Anaphylaxis, Release and Indemnification Agreement for Epinephrine Auto Injector*, is preferred for epinephrine auto injectors.
- 3. The parent/guardian is responsible for completing Part I and obtaining the authorized prescriber's statement on Part II. This is required every school year for each new or continuing order or if there is a change in dosage or time of administration during the school year. (A authorized prescriber may use office stationery or prescription pad in lieu of completing Part II.) Information necessary includes: student's name, diagnosis, medication name, dosage, time of administration, duration of medication, side effects, authorized prescriber signature, and date.
- 4. The medication must be delivered to the school by the parent/guardian or, under special circumstances, an adult designated by the parent/guardian. Under no circumstances will either school health (DHHS) or school (MCPS) personnel administer medication brought to school by the student.
- 5. All prescription medication must be provided in a container with the pharmacist's label attached. Non-prescription OTC medication must be in the container with the manufacturer's original label. Authorized prescriber samples must be appropriately labeled by the authorized prescriber.
- 6. The first day's dosage of any new medication must have been given at home before it can be administered at school.
- 7. The parent/guardian is responsible for collecting any unused portion of a medication within one week after expiration of the authorized prescriber's order or at the end of the school year. Medication not claimed within that time period will be destroyed.
- 8. Self-administered and/or non-medically prescribed medications are entirely the responsibility of the parent/guardian and not that of either MCPS or Montgomery County DHHS. Medications without accompanying authorized prescriber's orders and parent/guardian consent will not be stored in the health room.
- 9. Students may not self-administer controlled substances.
- 10. An authorized prescriber's order and parent/guardian permission are necessary for self-carry/self-administered emergency medications such as inhalers for asthma and epinephrine auto injector for anaphylaxis. The school nurse must evaluate and approve the student's ability and capability to self-administer medication. It is imperative the student understands the necessity for reporting to either the health staff or MCPS staff that they have self-administered their inhaler without any improvement or have self-administered an epinephrine auto injector, so 911 may be called.
- 11. The school nurse will call the prescriber, as allowed by *Health Insurance Portability and Accountability Act* (HIPAA), if a question arises about the student and/or the student's medication.
