

Ms. DeAngelo's Class Technology Changes

2013-2014

IT WORKS LIKE A KODAK.

You can make Good Pictures
with a Brownie Camera.

Every step is simple, even the developing is done without a dark-room. It makes fun for the rainy days indoors as well as for the bright days outdoors.

Brownies, \$1 to \$9. Write for the booklet of the Kodak Box.

EASTMAN KODAK CO., 358 State Street, Rochester, N. Y.

The Camera

Henry

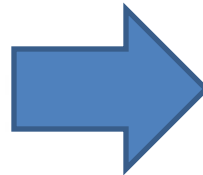

Introduction

People use the camera to remember events easily. Before the film camera people used the daguerreotype.

Copyright by The Library of Congress, 2008

First, it was the daguerreotype.

Then it changed to the film camera.

Helpful and Non-Helpful

It was helpful because the film camera could take a picture as fast as you can blink your eyes.

Some problems might be that if light touches the film you can't get the pictures developed.

Why its Special

The film camera is special because it was really fast. With the film camera you could copy pictures.

It was created before 1900.

Before it was invented, people used the daguerreotype. The daguerreotype was very slow while taking pictures.

Changing Lives

People's lives were changed in a positive way because the film is small and you can copy pictures. Also the film camera was really fast.

People's lives were changed in a negative way because film was expensive and if light touched the film you couldn't get them developed.

IT WORKS LIKE A KODAK.

**You can make Good Pictures
with a Brownie Camera.**

Brownies, \$1 to \$9. Write for the booklet of the Kodak Box.
EASTMAN KODAK CO., 358 State Street, Rochester, N. Y.

My Opinion

Overall, I think the change from daguerreotype to film camera is positive because the film camera is a lot faster than the daguerreotype

The Camera

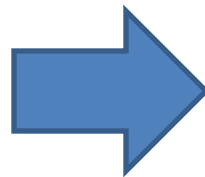

Jack w

Introduction

People use the camera to save memories so you can remember things about yourself. They also take many pictures you will also be able to take them quicker so you can see your pictures immediately .

First, it was paintings.

Then it changed to cameras.

Creative

The digital camera is special because if there is no film it will cost less money.

It was created between 1900-1999.

Before it was invented, people used film cameras.

Creative

It was helpful because you can see your pictures much faster and you can save lots of memories video tape and do many more things like look at all of your pictures.

Some problems might be there are so many buttons and controls so it`s hard to use. Some are very easy to break you could drop them because they are very small.

Changing Lives

People's lives were changed in a positive way because were made easier to use.

People's lives were changed in a negative way because cameras were fragile and could break easily.

My Opinion

Overall, I think the change from the daguerreotype to the digital is positive because it took a very long time to see the pictures and on digital cameras you can see them immediately.

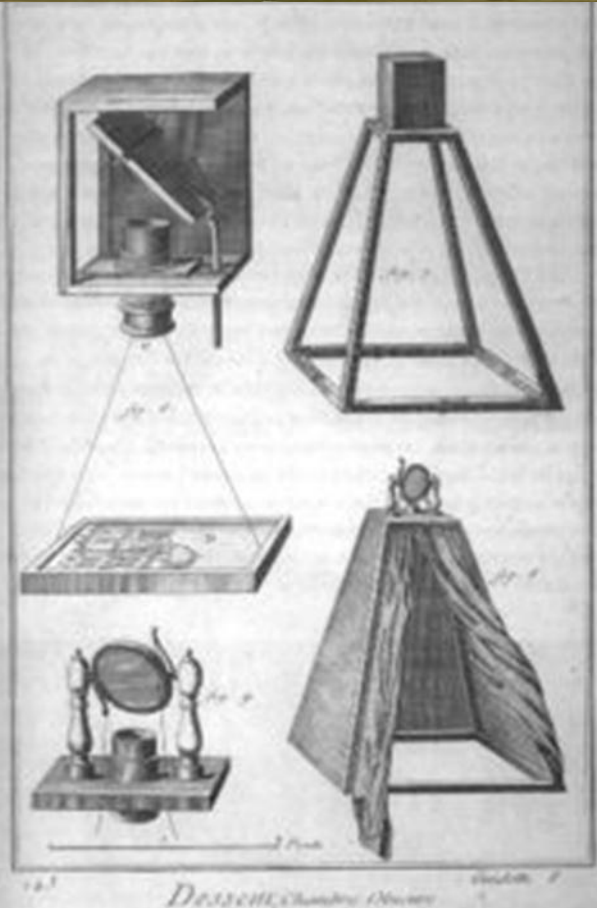

The Camera

Lila

© people by J. L. Photography 2013

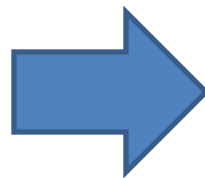

Introduction

People use the camera to take pictures and saving memories. It works by pressing a button and it captures light and makes a picture.

First, it was paintings

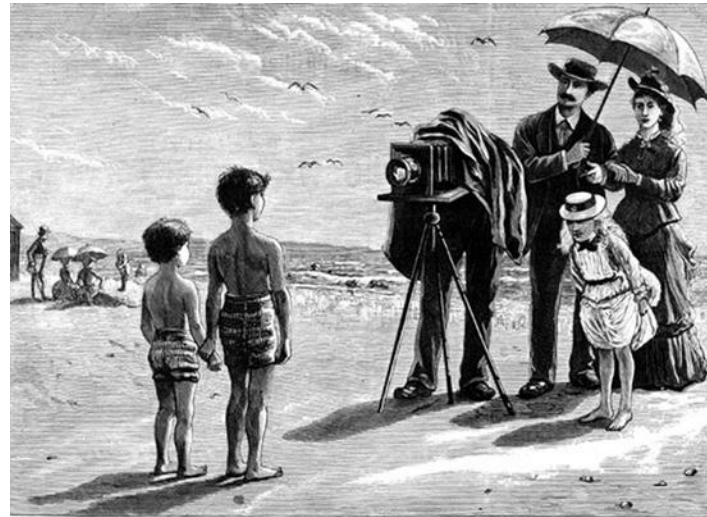

Then it changed to the Daguerrotype

It's so special

The Daguerreotype is special because it was the first camera made and people were amazed how a machine could capture light.

It was created before 1900

Before it was invented, people made paintings of the event.

THE BEACH ARTIST.—[SEE PAGE 60.]

Something good and something bad

It was helpful because a picture is more accurate than a painting , it was faster than a picture , it was something new , it was smaller than a painting and you could bring it anywhere.

Some problems might be if you don't like the picture you can't delete it , you'd have to sit still for 30 minutes to wait for the picture to develop , the pictures were black and white and they were small and blurry.

THE SKANDIC ARTIST—[Not Fair 006.]

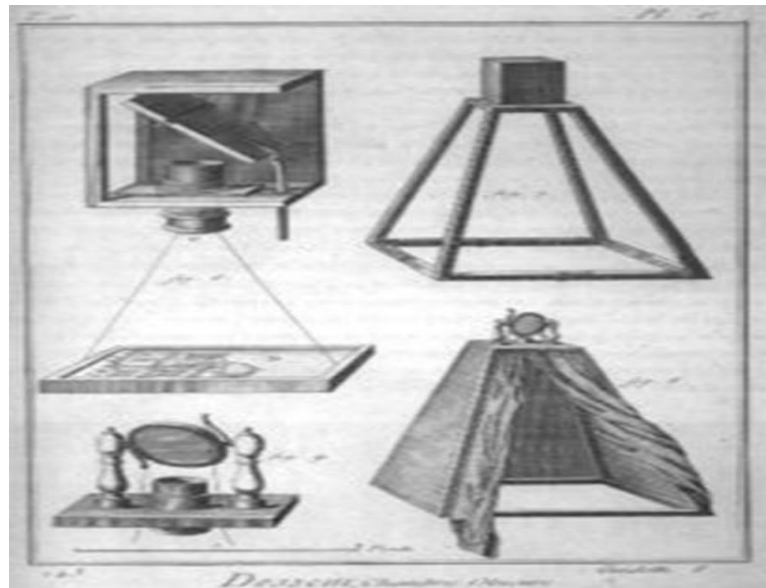

Changing Lives

People's lives were changed in a positive way because a picture is more accurate than a painting.

People's lives were changed in a negative way because it was much more money than a painting and the picture had a lot of smudges. The metal inside daguerreotype could harm the environment.

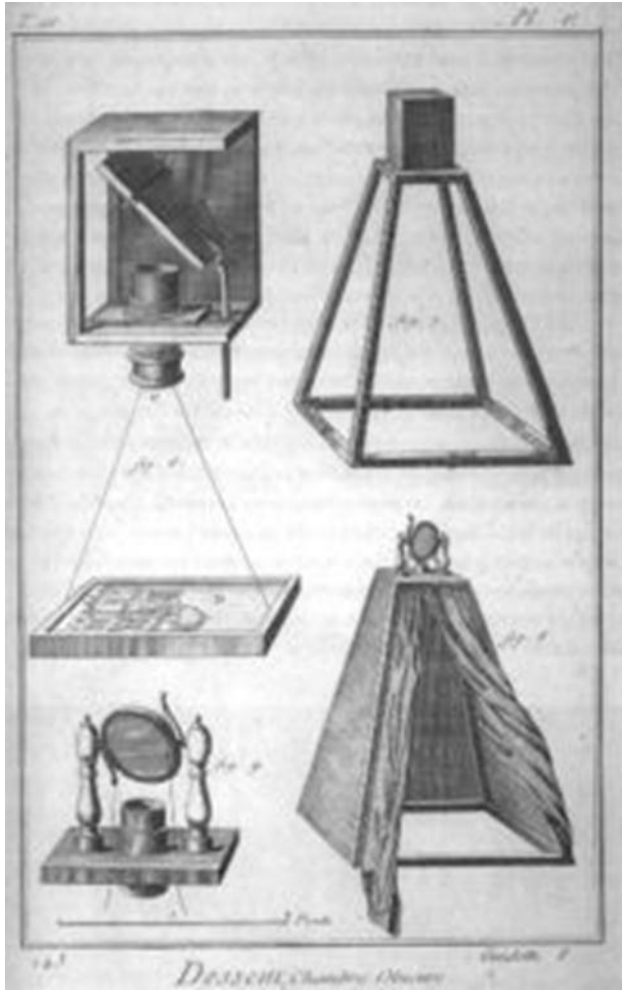

THE BEACH ARTIST—(No Face on.)

My Opinion

Overall, I think the change from paintings to the daguerreotype is negative because it was very slow and you had to wait thirty minutes for the picture to develop.

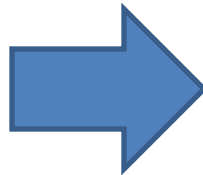

The Camera

Sara

Introduction

People use the camera to take pictures, share memories, to save memories and much more!

Copyright by The Library of Congress

First, it was paintings and drawings

Then it changed to the Daguerreotype

It's Special

The Daguerreotype is special because it was the first camera to be made.

It was created before 1900.

Before it was invented, people painted and drew.

Helpful and Not

It was helpful because the pictures looked real, it was faster than paintings and drawings and the Daguerreotype was smaller than the paintings.

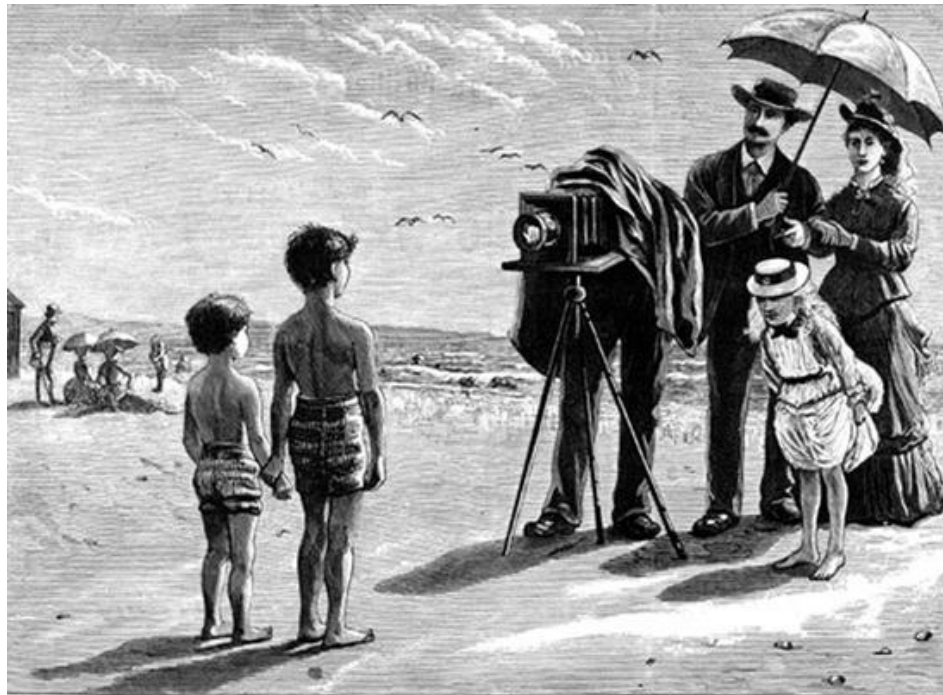

Some problems might be that you had to wait 6 minutes, you had to stay completely still, it took 30 minutes to take a picture and the pictures were small and blurry.

Changing Lives

People's lives were changed in a positive way because the daguerreotype doesn't use energy.

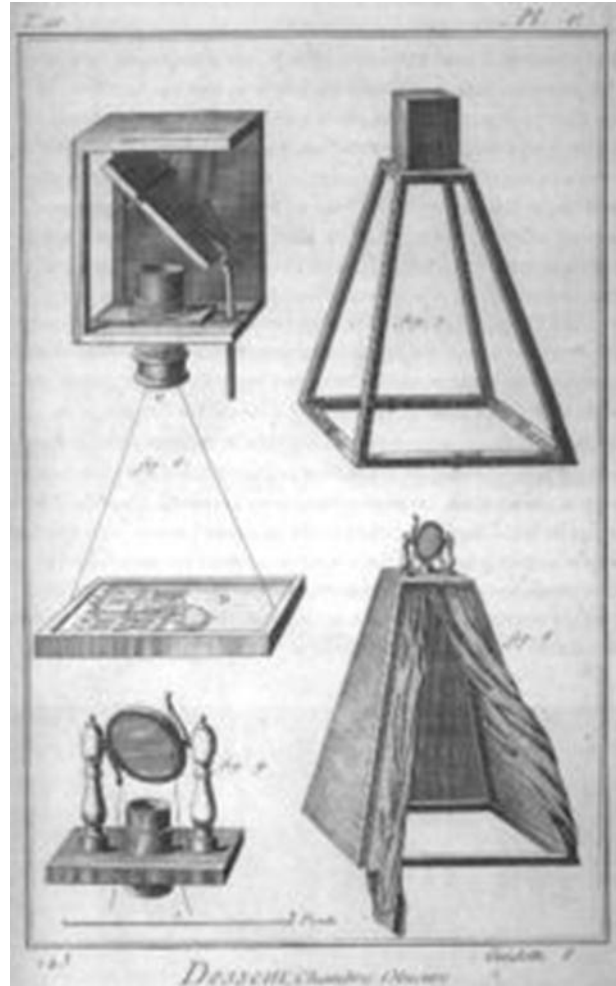

People's lives were changed in a negative way because the daguerreotype is hard to use and it only took pictures.

THE SEASIDE ARTIST.—[See Page 606.]

My Opinion

Overall, I think the change from paintings to the daguerreotype is positive because it takes a shorter time to do.

The Camera

Julia

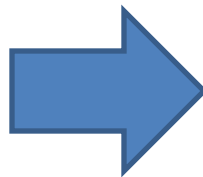

Introduction

People use the camera take photos and keep memories.

First, it was Film camera.

Then it changed to Digital camera.

When it was made

The digital camera is special because it has a sensor with lots of tiny pixels.

It was created between 1900-1999.

Before it was invented, people used the film camera to take photos.

Helpful/non helpful

It was helpful because the photos were clear and not smugy.

Some problems might be the digital camera might be to small and fall out and break .

Changing Lives

People's lives were changed in a positive way because you can take pictures faster and take more of them.

People's lives were changed in a negative way because it uses more electricity because it worked faster.

My Opinion

Overall, I think the change from film to digital camera is positive because now we can take pictures faster.

The Refrigerator

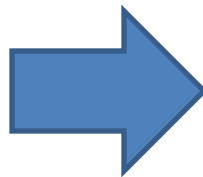

Arun

Introduction

People use the icebox to store food inside and to keep food cold and safe.

First, it was springhouses.

Then it changed to the icebox.

The icebox is special because it works by keeping the food cold with blocks of ice.

It was created in the 1900s.

Before it was invented, people used snow, ice, caves, cool streams, springs, cellars, underground and spring houses.

It was helpful because it keeps people safe and keeps germs away.

Some problems might be if people forgot to empty the water tray, the water will spill. The ice blocks are expensive and big. The ice box warmer as the big blocks of ice melted and the food spoiled.

Changing Lives

People's lives were changed in a positive way because it keeps food cold and keeps germs away. It also keeps food fresher longer.

People's lives were changed in a negative way because the heavy blocks of ice could injure people.

My Opinion

Overall, I think the change from springhouse to icebox is positive because it keeps food cold and germs away.

The Refrigerator

Audrey

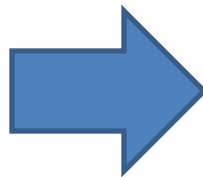

Introduction

People use the refrigerator to keep food cold and healthy and safe to eat. Wow! It also was used to keep food from getting bad cells and chemicals.

First, it was ice box.

Then it changed to Electric refrigerator.

All About The Electric Refrigerator.

The Electric refrigerator is special because it has more room and storage.

It was created between 1900 – 1999.

Before it was invented, people used an ice box. And even before the ice box people used the Spring house.

Problems and Helpful Things.

It was helpful because it can fit more food. It can also have many shelves. You can get water and ice cubes from the door.

Some problems might be it was hard to open. Your refrigerator could be the wrong temperature. There could be bad gas that can get you sick or even die.

Changing Lives

People's lives were changed in a positive way because it could be easy to use. And your refrigerator could be a good price. It can also keep more food safe. Your refrigerator could have more room and storage.

People's lives were changed in a negative way because it can make life harder by taking up room in your house or kitchen. It could be too heavy. You could hurt your self with the wires and it could leak bad gas. It was also to expensive.

My Opinion

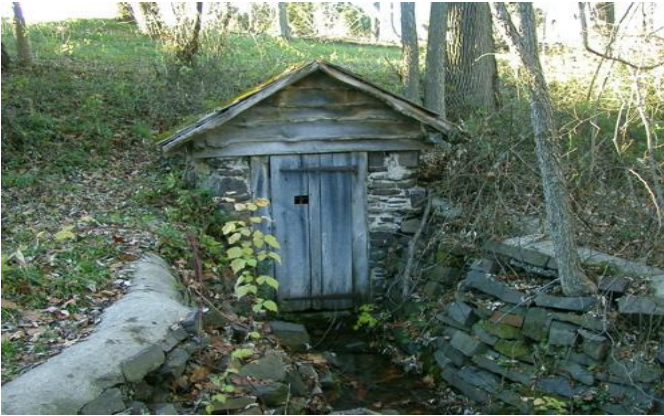

Overall, I think the change from Ice box to Electric Refrigerator is positive because it keeps food healthy and safe to eat. And it does not have a big block of ice inside. And that means it has more room and storage.

The Refrigerator

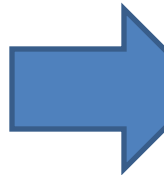

Mia

Introduction

People use the refrigerator to keep food cool and for storing food inside.

First, it was a springhouse.

Then it changed to an icebox.

Why its special

The icebox is special because ice can get delivered to it was popular.

It was created between 1900.

Before it was invented, people used snow cool streams ice.

Why its helpful

It was helpful because the icebox keeps germs away. It helps you from getting sick.

Some problems might be the ice could melt it is lots of work it made puddles.

Changing Lives

People's lives were changed in a positive way because it was fine for the environment it could store food.

People's lives were changed in a negative way because it could leave puddles. The ice could melt.

My Opinion

Overall, I think the change from springhouse to icebox is negative because it was lots of work you need to make it work yourself.

The Refrigerator

By : Sean B.

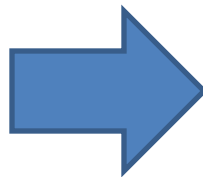

Introduction

People use the refrigerator to keep food cold for the food that will spoil.

First, it was the ice box.

Then it changed to the refrigerator.

When it was Made

The refrigerator is special because uses a motor and a special compressor.

It was created between 1900-1999.

Before it was invented, people used ice boxes and before the ice boxes they used spring houses. In the 19th centry ice boxes were used in England.

Problems and Good

It was helpful because people liked refrigerators because they didn't leak like ice boxes.

Some problems might be the early refrigerator there were harmful gases inside. It broke very often. It broke very often.

Changing Lives

People's lives were changed in a positive way because a early refrigerator was really easier than the energy saving one.

People's lives were changed in a negative way because in the early refrigerator there was a harmful gas inside.

My Opinion

Overall, I think the change from ice box to the refrigerator is a positive change because no one had to pay for ice any more.

The Refrigerator

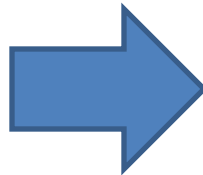

By Silas

Introduction

People use the refrigerator to keep food from spoiling.

First, it was an Ice Box.

Then it changed to the Electric Refrigerator

The special.

The Electric Refrigerator is special because it uses a motor to keep food cold.

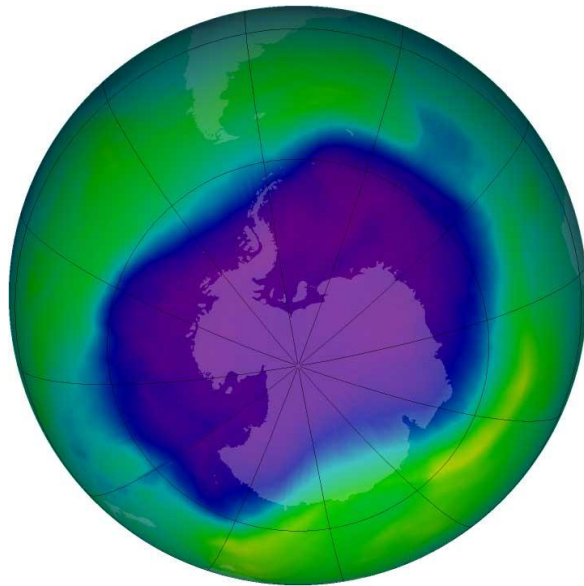

It was created between 1900 – 1999.

Before it was invented, people used an Ice Box.

Good and Bad.

It was helpful because it can cool food faster.

Some problems might be gas inside can be harmful to breaking the ozone layer.

Changing Lives

People's lives were changed in a positive way because food was kept cooler than the ice box.

People's lives were changed in a negative way because it is very expensive.

My Opinion

Overall, I think the change from ice box to electric refrigerator is positive because food won't spoil as much.

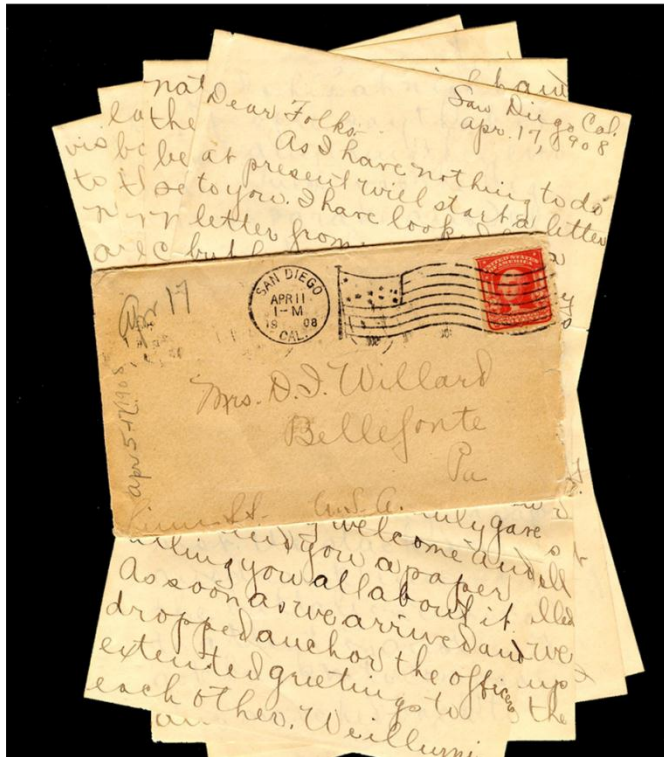

The Telephone

Jack M

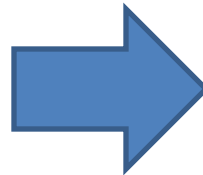

Introduction

People use the telephone to communicate with people far away and close that the eye can not see.

First, they sent letters.

Then it changed to calling.

Special 1900!!

The telephone is special because it was the first phone.

It was created before the 1900.

Before it was invented, people used smoke signals, morse code and sent letters.

Good and Bad!!

It was helpful because you could talk to people that you can't see and you can communicate faster.

Some problems might be you had to hold the ear piece to your ear and you had to stay in one place.

Changing Lives

People's lives were changed in a positive way because you could talk to people faster and it was easy to use.

People's lives were changed in a negative way because every one wanted to have it and not a lot of people had

My Opinion

Overall, I think the change from the letters to the telephone is positive change because you can tell people things faster and it easy to use.

The Telephone

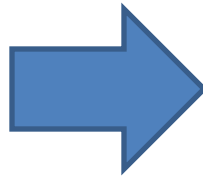

Brandon

Introduction

People use the smart phone to communicate with friends and families and to spread news to people.

First, it was a hand cord phone.

Then it changed to a smart phone.

Helpful and problems

It was helpful because you could check your email. There is a touch screen. You can take pictures. It is like a mini computer. You can see each other.

Some problems might be its heavy, it is big, you can become deaf, it is easy to drop, they can cause car accidents. It can cause injuries.

Special 1999

The smart phone is special because you can play games, you don't need a cord, you can shop, you can read and get directions.

It was created between 1900-1999.

Before it was invented, people use cell phones, the cordless phone and the telephone.

Changing Lives

People's lives were changed in a positive way because it is easy to buy, there is more technology in it and it does many things.

People's lives were changed in a negative way because you can become deaf, cellphone towers can block pretty sights.

My Opinion

Overall, I think the change from the cellphone to the smart phone is positive because the smart phone is smarter, you can do more things like, check your email, take pictures and play games.

The Cell Phone

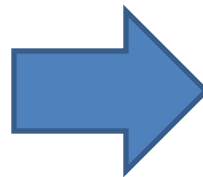

Chloe

Introduction

People use the telephone to communicate from far away and to hear news.

First, it was Telephone.

Then it changed to cell phone.

Cell Phone

The cell phone is special because there is no cord and Dr. Martin Cooper made the first cell phone.

It was created between 1900-1999.

Before it was invented, people use telephone and cell phone.

Negative and Positive

It was helpful because You can walk around the house with it because it had no cord and you can use it anywhere.

Some problems might be some people doesn't like the cell phone towers and many cars had accidents injuries and even deaths and it didn't work until 1980's. Talking while driving is very very un-safe.

Changing Lives

People's lives were changed in a positive way because cell phone could be easy to use and has more technology.

People's lives were changed in a negative way because people don't like the cell phone towers.

My Opinion

Overall, I think the change from telephone to cell phone is positive because you can communicate from far away.

The Telephone

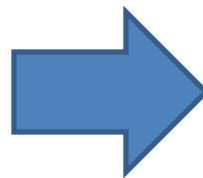

Grant

Introduction

People use the smart phone to listen to other people. People communicate with phones but mostly smart phones. Every one is getting the smart phone. The smart phone is better for talking then most phones.

First, it was hand cord.

Then it changed to smart phone.

The smart phone is special because the smart phone has better teck than any other phones.

It was created

Before it was invented, people used cell phones. And people used cord phones.

Click to add title

It was helpful because the smart phone has a touch screen. The smart phone is than most phones. The smart phone has a camera. The smart phone can more things.

Some problems might be the smart phone has a battery. The smart phone wastes lechery. The smart phone can get you deaf. The smart phone is easy to lose because the smart phone is small. The smart phone distracting so you can crash in a car.

Changing Lives

People's lives were changed in a positive way because the smart phone lets you work and learn. The smart lets you do many things like reading. The smart phone fits in your pocket. The smart phone is ureter to buy.

Peoples lives were changed in a negative way because the smart phone is more trash for the averment. The smart phone get's better velum but you can get deaf.

My Opinion

Overall, I think the change from _ to _ is (positive or negative) because cell phone to smart phone is positive because you can communicate with people in many ways. The smart phone has games on it. There many different smart phones. The smart phone has better tack neology.

The Telephone

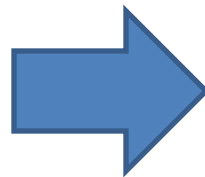

J.J.

Introduction

People use the cordless telephone to communicate to a far place or not so far place. It was also used for getting news or giving news to others. And it's used for planning.

First, it was a hand cord.

Then it changed To the cordless telephone.

Special 1900

The cordless telephone is special because it had no cords so you could walk around the house with the cordless telephone.

It was created between 1900 to 1999.

Before it was invented, people used code messages, morse code, smoke signal and last they used notes and a lot of them.

Good!!and Bad!!

It was helpful because there more convenient for a lot of people. Also there were no messy cords and you could walk around with the cordless telephone and last there was no tripping on any cords.

Some problems might be after you were done using it you had to put it back the charger. If the antennae broke the whole phone would be broken the call would not send. The cordless telephone did not work at first. Last you had to be close to the base.

Changing Lives

People's lives were changed in a positive way because there were no messy cords to trip on and hurt you.

People's lives were changed in a negative way because messages did not make you deaf and messages didn't block pretty views.

My Opinion

Overall, I think the change from messages to cordless telephone is negative because it made things you wanted to do by taking work time away because you could be playing games the whole day.

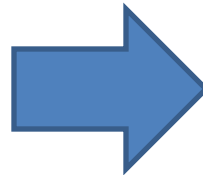

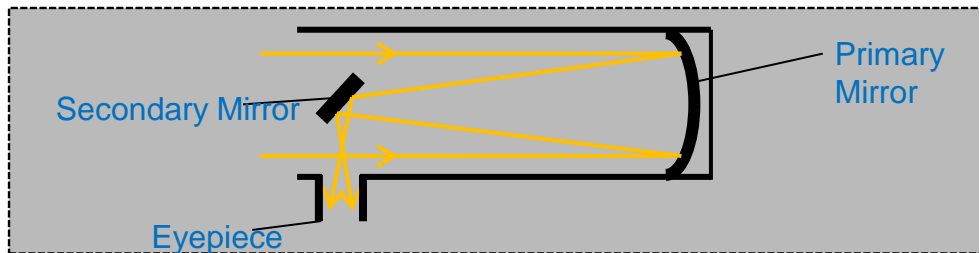

The Telescope

Ben

Introduction

People use the Hubble to see space.

First, it was horrible Newton's

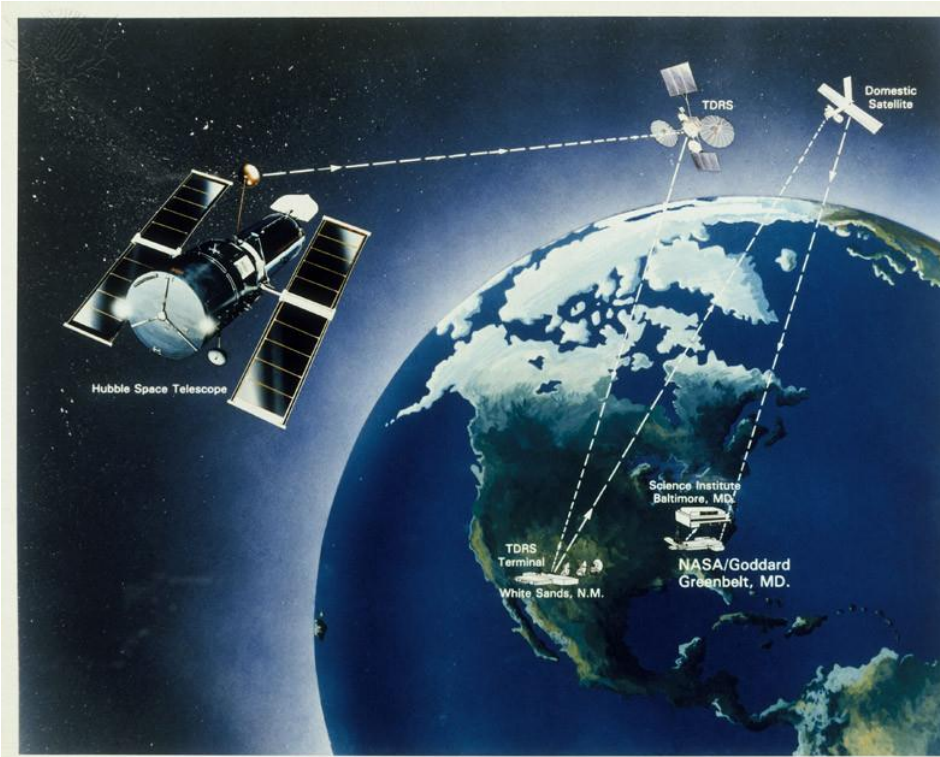

Then it changed to the stupid Hubble

Special Hubble!!!!

The awesome Hubble is special because it takes pictures from space.

it was created between 1900 and 1999.

Before it was invented, people used horrible Newton's Which Is a different type of telescope.

Good And Bad!!!!

It was very helpful because it takes good pictures. It is in space.

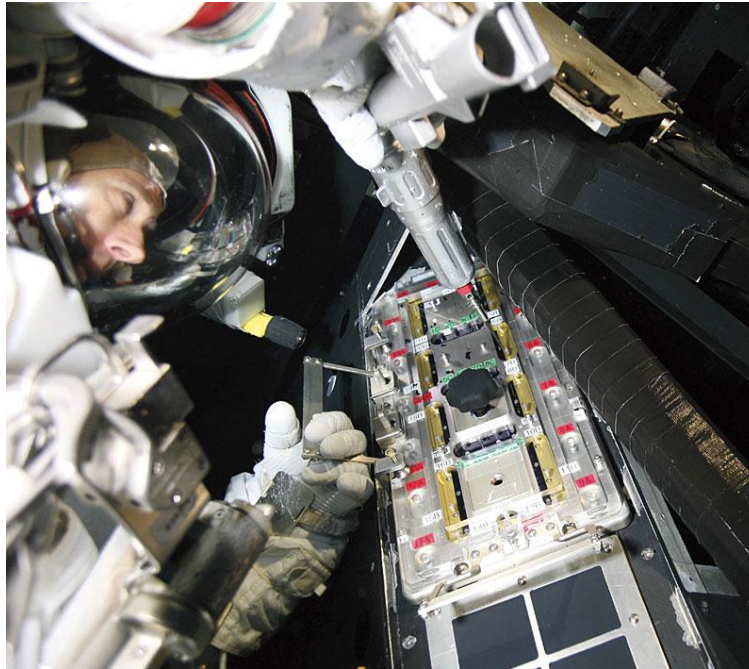

Some problems might be the glass could shatter. It could stop taking Pictures.

Changing Lives

People's lives were changed in a very positive way because they learned more things about space.

People's lives were changed in a negative way because it was very hard to fix.

My Opinion

Overall, I think the change from horrible Newton to The stupid Hubble is positive because people learned a lot about space.

The Telescope

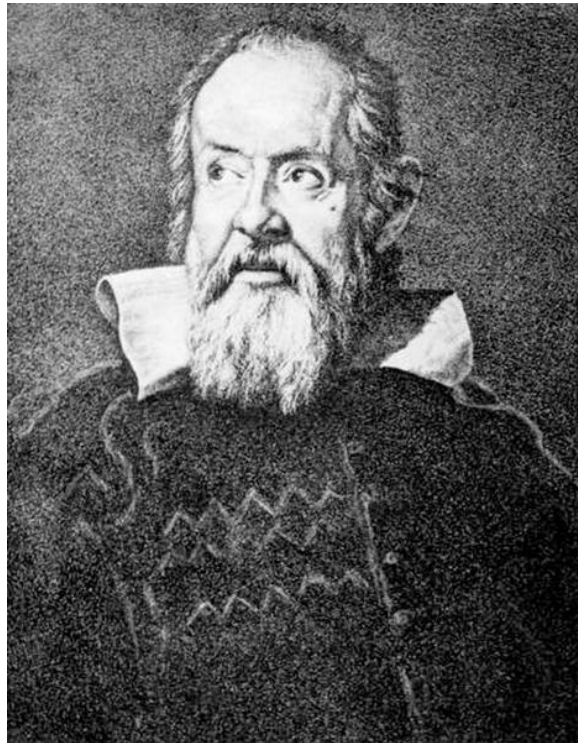

Brooke

Galileo's telescope

Galileo's telescope is special because it was the first telescope to be invented and it was a refracting telescope .

It was created before the 1900s

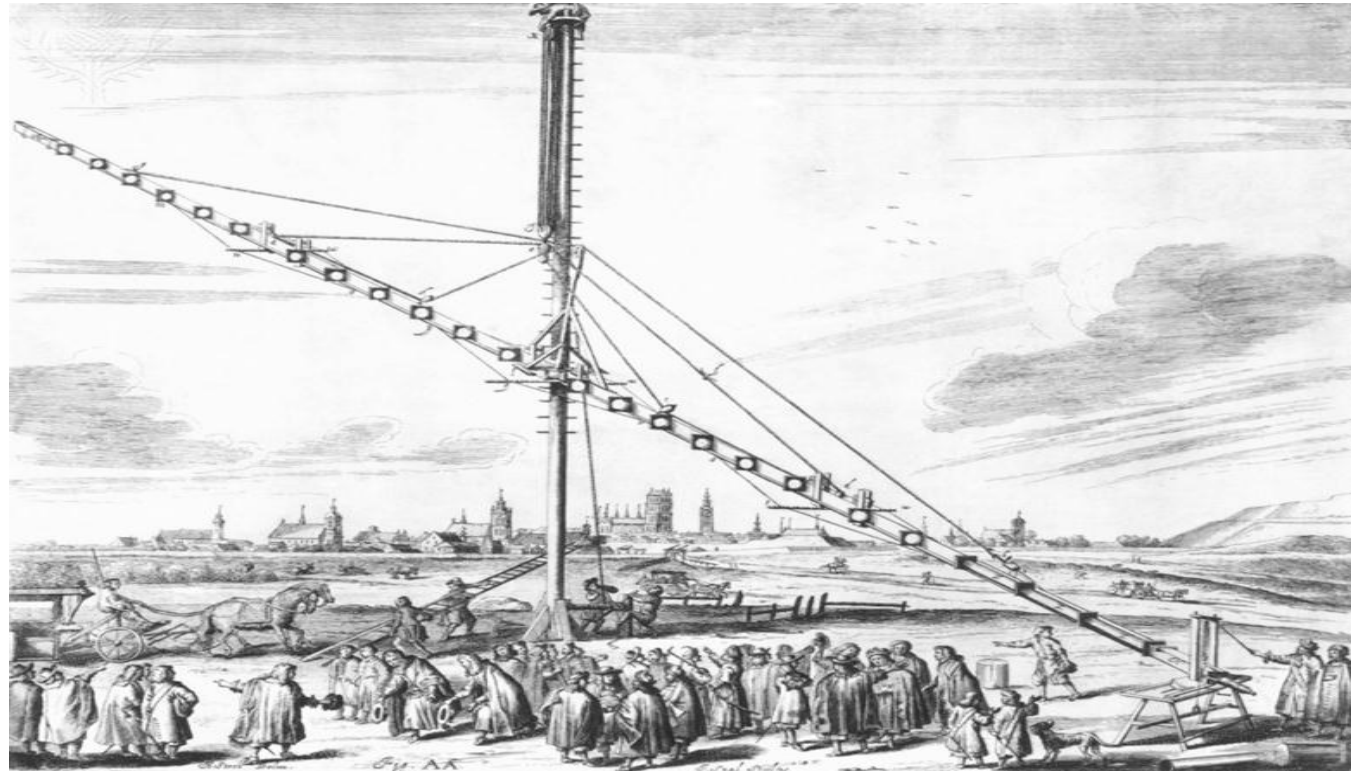

Before it was invented, people used their eyes to see objects.

Good and bad!!!!!!!!!!!!!!

Galileo's telescope was helpful because while it made things bigger it made things lighter at the same time it also made people happy to learn about the sky.

Some problems might be so many people wanted them that there weren't many to buy.

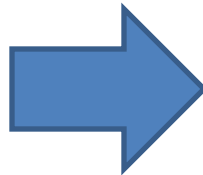

Big Change

People use Galileo's telescope to observe objects ,and also to stretch far images.

First , it was peoples eyes

Then it changed to Galileo's telescope.

Changing Lives

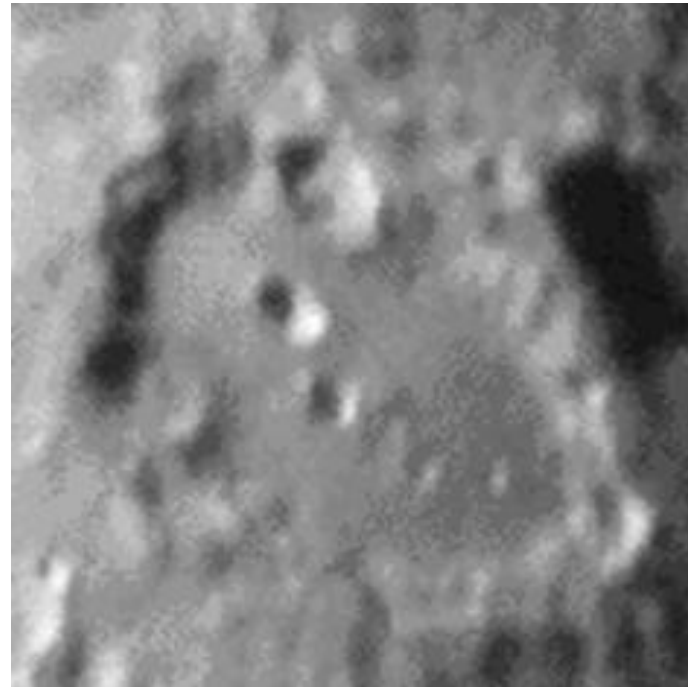

People's lives were changed in a positive way because people could see objects like stars and other small items.

People's lives were changed in a negative way because you couldn't focus on one thing you were looking at.

My Opinion

Overall, I think the change from eyes to Galileo's telescope is negative because there weren't many telescope's to buy and they didn't see very far up in the sky.

The Telescope

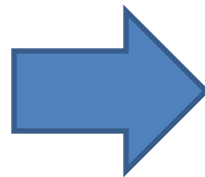

By Ian

Introduction

People use Newton's telescope to see images such as comets, stars and planets from far away look bigger/closer.

First, it was Galileo's.

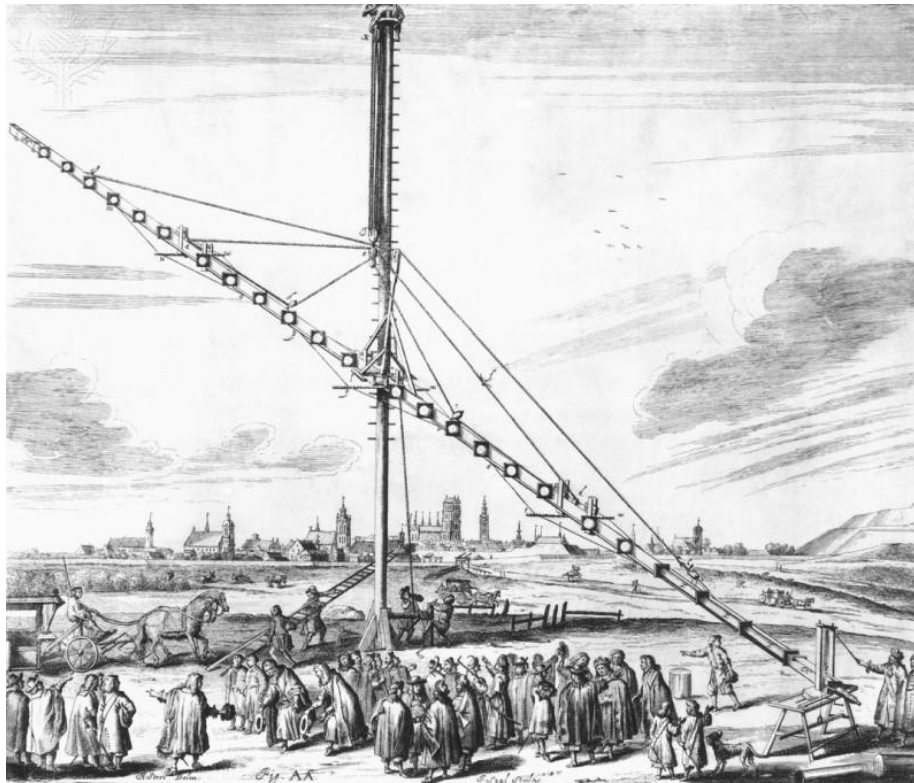

Then it changed to Newton's .

History

Newton's telescope is special because most people liked it and it is smaller than the other telescopes.

It was created before 1900.

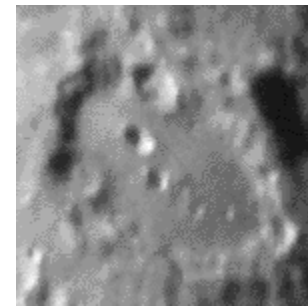

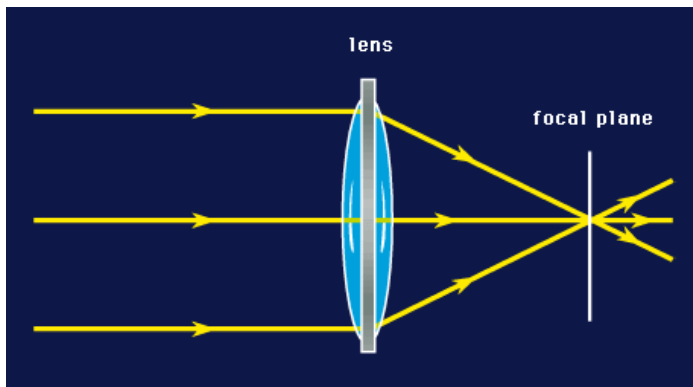

Before it was invented telescopes were longer than Newton's telescope.

Good and Bad

Newton's telescope was helpful because it was better than your eyes alone Galileo's telescope and the 150 foot telescope .Images were not as blurry as Galileo's telescope.

Some problems might be the reflectors were not perfect any moving air would make the object seem like it was moving back and forth. But still did not solve the problem.

Changing Lives

People's lives were changed in a positive way because sees stars better than Galileo's telescopes and is much smaller than the Hubble Telescope

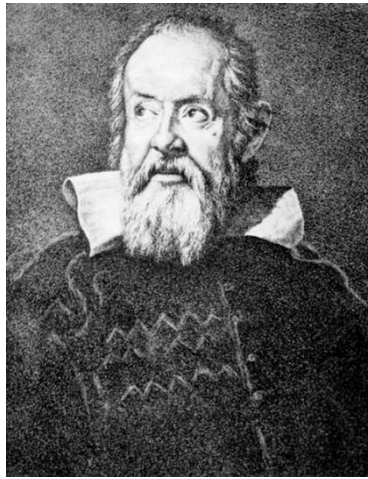

People's lives were changed in a negative way because Newton's telescope was made out of carved metal and carved metal causes pollution because it is hard to carve metal so you would have to use a factory and factory's cause pollution.

My Opinion

Overall, I think the change from Galileo's telescope to Newton's is positive because Galileo's telescope's didn't work as well as Newton's telescope.

The Telescope

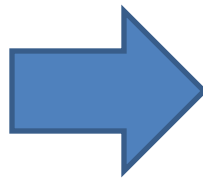

Jacob

Introduction

People use the telescope to make things look bigger and figure out things about the universe like planets and stars.

First, it was eyes.

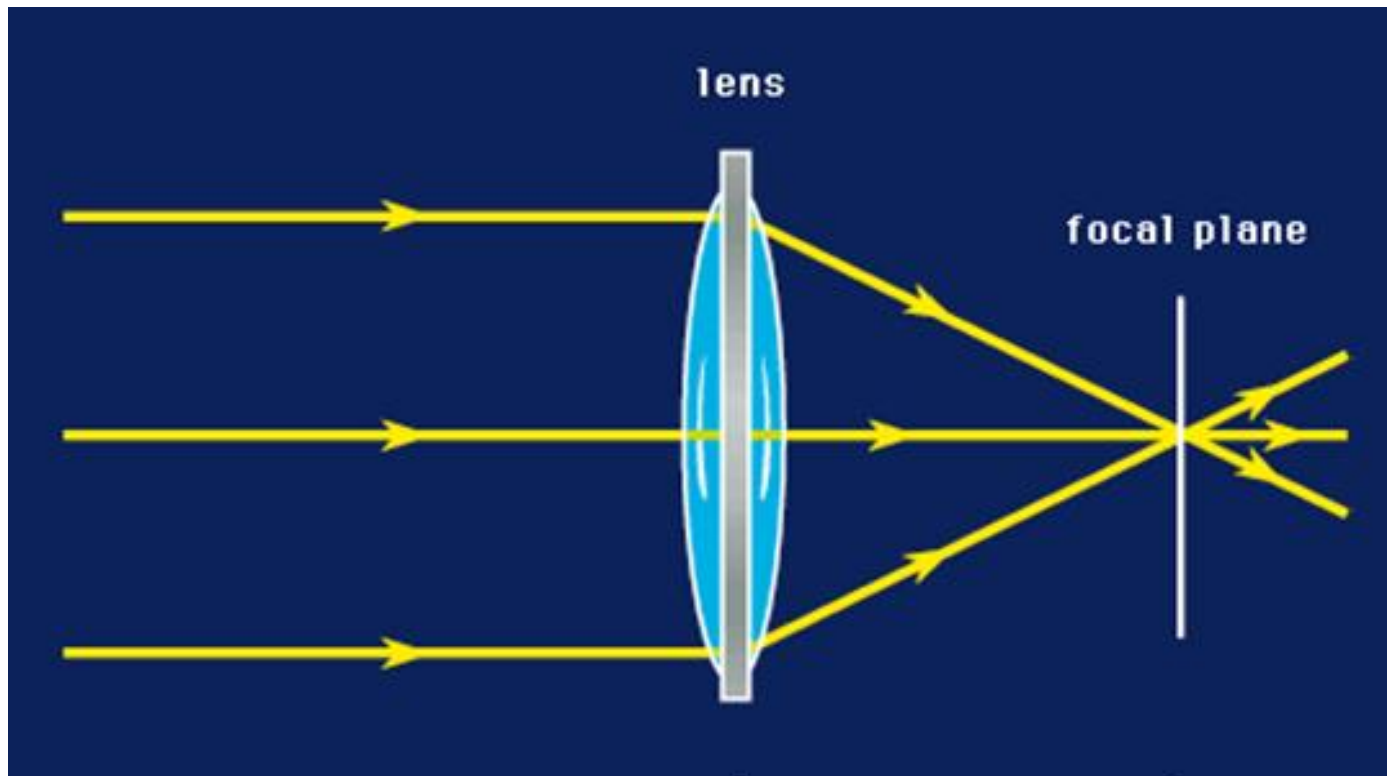

Then it changed to Galileo's telescope.

Specialty

The Galileo's telescope is special because it has a convex lens. It also concentrates light and creates an image with the light.

It was created before 1900.

Before it was invented, people used their eyes to look at planets and stars.

Good and bad

It was helpful because it could figure out things about the universe like that the moon was not smooth it also found four moons around Jupiter. It also makes things lighter.

Some problems might be are it does not magnify much. It also has to be shaped exactly right. It also makes the color different. It also was kind of blurry.

Changing Lives

People's lives were changed in a positive way because you can see the universe closer up. You can also be able to bring it on a trip because it was smaller than other telescopes.

People's lives were changed in a negative way because it only made things look closer. It is also hard to focus on one thing.

My Opinion

Overall, I think the change from eyes to Galileo's telescope positive because can see farther than eyes.

The Telescope

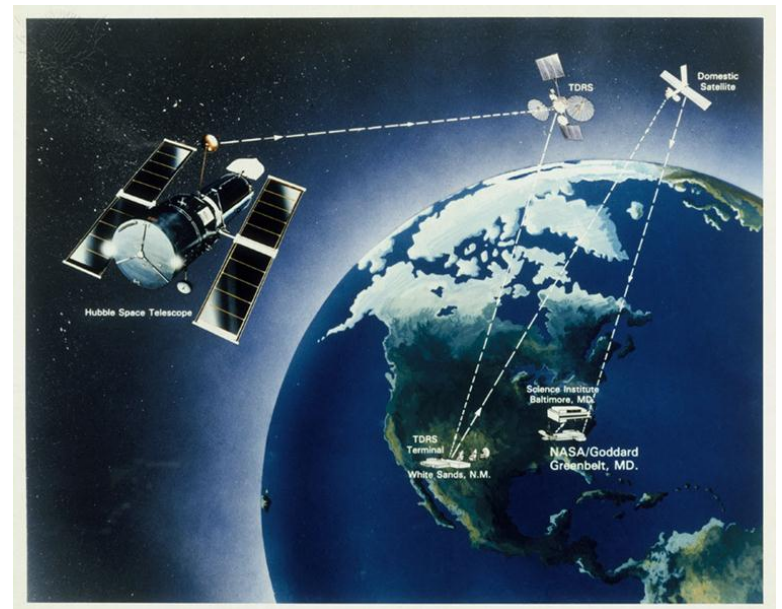

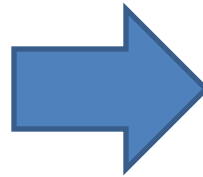

Lori

Hubble Telescope

People use the Hubble telescope to see things far away like space.

First, it was Galileo's

Then it changed to Hubble

When it was Made

The Hubble is special because it collects and concentrates on light.

It was created between 1900-1999.

Before it was invented, people used their eyes and the Galileo's telescope.

It was helpful because it took amazing pictures of space. It takes amazing images of things you want to take pictures of.

Some problems might be it might not work forever. Sometimes it's difficult to work.

Changing Lives

People's lives were changed in a positive way because now we can see things closer and better.

People's lives were changed in a negative way because it was very expensive.

My Opinion

Overall, I think the change from Galileo's to Hubble is negative because it took blurry pictures at first. What would you do if your telescope took blurry pictures?
