Clarksburg faculty, staff, and students are using Web 2.0 tools to facilitate online collaboration and sharing of information. Students are more engaged when using technology products, and it is part of the Maryland School Library Media State Curriculum that students, “[u]se technology to present findings/conclusions in a variety of formats.” Students have been using many online tools this year as part of their research, such as Glogster, Prezi, and Animoto.

This quarter teachers voluntarily received instruction in the Media Center on how to create and incorporate “Wordles” into their lessons. Additional Web 2.0 trainings are being planned to assist faculty and staff with their technology professional development.
