

IB Chemistry

Do you want to learn how CHEMISTRY can help solve some of the world's most pressing issues?

Obesity, Clean Water, Energy Sources, Global Warming, Pollution

Chemicals in your Body

- **Caloric intake**
- **Energy for muscles**
- **Types of fat, fiber, and carbohydrates**
- **Protein synthesis**
- **Vitamins, Minerals and Hormones**

40 hours of lab

- Design
- Data Collection and Processing
- Conclusion and Evaluation

Chemicals in the Environment

- **Pollution (air, water, soil, and waste)**
 - **Greenhouse Gases**
 - **Ozone depletion**
