

🐞 IB Environmental Systems and Societies 🐞

Standard Level Interdisciplinary Course in Group 3 or 4

Course Description: Through studying IB Environmental Systems and Societies students are provided with a coherent perspective of the interrelationships between environmental systems and societies; one that enables them to adopt an informed personal response to the wide range of pressing environmental issues that they will inevitably come to face.

Students evaluate the scientific, ethical and socio-political aspects of issues. The students participate in several field trips during the school year with an affiliation with the Bridging the Watershed Program and the University of Maryland School of Public Health.

**"We do not inherit the earth from our ancestors; we borrow it from our children."
-- Chief Seattle**
