

Strategic Planning Network Team Meeting Summary Updates

As a way to keep interested stakeholders informed of the ongoing work to revise the Montgomery County Public Schools strategic plan, a summary of each of the Strategic Planning Network Team work sessions will be created and available in a variety of venues.

Strategic Planning Network Team Work Session # 3 March 7, 2013

At the third meeting of the Strategic Planning Network Team, the teams reviewed the results of the *First Thoughts* activity on proposed skills and knowledge in the three competency areas—Academic Excellence, Creative Problem Solving, and Social Emotional Learning—generated at the March 5, 2013, Community Meeting on the Strategic Plan. Team members were asked to determine if there were any new ideas that needed to be incorporated into the list generated at the last meeting, as they continued to work to clarify, prioritize, and narrow the skills and knowledge statements for each of the three competencies.
