

# Bottled Water: Understanding your choice...

**It's your world...choose to conserve!**

Have you ever considered the energy footprint of producing water bottles?

It takes 32 to 54 million barrels of oil to manufacture the bottled water consumed in the United States (2007).

This is 2,000 times more than producing tap water!

Planning your next event?  
Encourage participants to bring their own water...

**reduce, reuse, recycle**
