

Available Recommended Online Safety Training Courses

Course Name	PDO Course #	Course Description
Accident Investigation	85686	This course is designed to provide employees with an understanding of accident investigation procedures.
Aerial Lift Safety	53922	This course provides staff members with an overview of important safety procedures to be used when operating an aerial lift. This course is not intended to replace hands-on training for the specific aerial lift that you will be using at your job.
Back Injury & Lifting	53912	This course reviews techniques to improve lifting and carrying and to avoid injuries in the workplace.
Cardiopulmonary Resuscitation (CPR)	85687	This course focuses on key CPR techniques, considerations and precautions. This course is not intended to replace hands-on training or certification training.
Classroom Safety	53914	This basic course discusses safety hazards and practical injury avoidance techniques associated with everyday situations in the classroom.
Confined Spaces	85131	The goal of this course is to familiarize facilities and maintenance staff members with the hazards of confined spaces.
Defensive Driving	64582	This course is a comprehensive tutorial designed to describe strategic driving and includes real-world driving scenarios to help improve your decision-making when you're behind the wheel.
Electrical Safety	53915	This course addresses a wide variety of electrical safety issues in the work environment.
Fall Protection	53479	This course will address practices designed to protect staff members from the most common fall risks when working at heights over four feet.
Hand & Power Tool Safety Overview	85509	This course provides employees with an understanding of the best practices for safely operating hand and power tools on the job.
Hazard Communication: Right to Understand	74690	This course reflects OSHA's 2012 revised Hazard Communication Standard that now gives workers the "right to understand" chemical hazards they may encounter in the workplace.
Heat Illness Prevention	53919	Heat Illness Prevention is designed for any employee who might be exposed to conditions of excessive heat.
Ladder Safety	53920	This course demonstrates the importance of using the proper equipment to work safely above the floor.
Lead Safety Awareness	85446	This course provides basic knowledge about the dangers of lead, as well as safeguard strategies.
Lockout/Tagout: Energy Release	53923	This course demonstrates situations in which LOTO is required and encourages employee implementation of processes to protect themselves and others.

Available Recommended Online Safety Training Courses

Course Name	PDO Course #	Course Description
Office Ergonomics	53924	This course reviews techniques to improve posture and technique, stretching exercises, and provides instruction on proper workspace arrangement including chair, table, and computer terminal configurations.
Playground Maintenance & Inspection	53926	The course illustrates the most common hazards for playground equipment. The course details important fall-surfacing criteria to minimize playground injury as well as proper use zones for playground equipment.
Personal Protective Equipment (PPE)	53925	This course addresses different types of Personal Protective Equipment (PPE), how they are used, and how job hazard assessments can be used to determine appropriate PPE for a job.
Safety Data Sheets (GHS)	74694	This course provides staff with an understanding of Safety Data Sheets for hazardous chemicals, and the knowledge to use the information found in SDSs to protect themselves and others in the workplace.
Scaffolding Safety	53928	The goal of this course is to supply employees with a basic understanding of the best practices involving the safe use of scaffolding.
Science Lab Safety	53929	The goal of this course is to provide an overview of basic procedures and policies necessary to ensure the safe operation of a school science area. The course also outlines general laboratory safety practices, which can be passed on to students.
Scissor Lift Safety	53930	This course provides school staff with an overview of important safety procedures to be used when operating a scissor lift. This course is not intended to replace hands-on training for the specific scissor lift that you will be using on your job.
Slips, Trips, & Falls	53931	This course provides staff members specific guidelines to prevent slip, trip, and fall injuries. A series of interactive scenarios allow employees to immediately apply what they've learned to avoid hazards.
Supervisor's Role in Safety	54145	This course examines the supervisor's role in safety planning and explains how to effectively apply best practices to ensure worker safety.
