**RESOURCE, HOME SCHOOL MODEL, AND ELEMENTARY LEARNING AND ACADEMIC DISABILITIES SERVICES**

**RESOURCE**

Resource services are available in all MCPS schools and provide students with disabilities with the support they need to be academically successful in the general education environment. Resource teachers provide an array of services to students with disabilities including strategy-based instruction; direct instruction aligned with the Maryland College and Career-Ready Standards in reading/language arts, writing, mathematics, and organizational skills in preparation for the Partnership for Assessment of Readiness for College and Careers (PARCC).

Elementary and middle schools staffed with an hours-based staffing model include the resource teacher in the special education staffing allocation.

**ELEMENTARY LEARNING AND ACADEMIC DISABILITIES (LAD) / HOME SCHOOL MODEL**

Elementary Home School Model and LAD supports students in Grades K–5 as a result of a disability that impacts academic achievement in one or more content areas, organization, and/or behavior. Students served by this model are assigned to age appropriate heterogeneous classes in their neighborhood schools. Student access to the general education curriculum during the course of the day is based on individual student needs and encompasses a variety of instructional models that may include instruction in a general education environment and/or a self-contained setting.

**SECONDARY LEARNING AND ACADEMIC DISABILITIES (LAD)**

Secondary LAD Services, available in all secondary schools in MCPS, provide services to students as a result of a disability that impacts academic achievement. Students served by this model previously received a considerable amount of special education support, but need additional services in order to demonstrate progress toward their IEP goals and objectives. These services are provided in a continuum of

PROGRAMS AND SERVICES LOCATIONS FOR SPECIAL EDUCATION STUDENTS 2017-2018

settings that may include components of self-contained classes, cotaught general education classes, and other opportunities for participation with nondisabled peers.

<b>All</b>	<b>All</b>

**LEARNING FOR INDEPENDENCE (LFI)**

LFI services are designed for students with complex learning and cognitive needs, including mild to moderate intellectual disabilities. Services support the implementation of Alternate Academic Learning Outcomes aligned with Curriculum 2.0. Students are provided with many opportunities for interaction with general education peers, including inclusion in general education classes as appropriate, peer tutoring, and extracurricular activities. They learn functional life skills in the context of the general school environment and in community settings. Community-based instruction and career/college readiness are emphasized at the secondary level so that students are prepared for the transition to post-secondary opportunities upon graduating with a certificate from the school system

**GIFTED AND TALENTED LEARNING DISABLED (GT/LD) SERVICES**

Twice exceptional students receiving GT/LD services demonstrate superior cognitive ability in at least one area and typically have production problems, particularly in the area of written expression. GT/LD services provide students with specialized instruction, adaptations, and accommodations that facilitate appropriate access to rigorous instruction in the least restrictive environment, which may include placement in Honors or Advanced Placement classes, and access to the acceleration and enrichment components in the MCPS instructional guidelines.

**ELEMENTARY SCHOOL-BASED LEARNING CENTER**

Elementary Learning Centers provide comprehensive special education and related services. The program offers a continuum of services for Grades K–5 in self-contained classes with opportunities to be included with nondisabled peers in the general education environment. These services address the goals and objectives in the student’s IEP while ensuring access to the general curriculum through strategies such as assistive technology, reduced class size, and differentiated instruction.

**SCHOOL/COMMUNITY-BASED PROGRAM (SCB)**

SCB program services are designed for students with severe or profound intellectual disabilities and/or multiple disabilities. Students typically have significant needs in the areas of communication, personal management, behavior, and socialization. The program emphasizes individualized instruction, utilizing Alternate Academic Learning Outcomes aligned with Curriculum 2.0 in comprehensive schools and related community and work environments. The SCB model includes the following components: age-appropriate classes, heterogeneous groupings, peer interactions, specialized instruction, community-based instruction, and career readiness. The goal of the program is to prepare students to transition to post-secondary opportunities upon graduation with a certificate from the school system.

**EXTENSIONS PROGRAM**

The Extensions Program serves students of middle and high school age with the most significant cognitive disabilities, multiple disabilities, and/or autism. These are students with a prolonged history of receiving systematic behavioral supports and services to reduce self-injurious and/or disruptive behaviors. The goal of the Extensions Program is to provide intensive educational programming to enable these students to acquire appropriate social and communicative skills in order to facilitate their access to Alternate Academic Learning Outcomes aligned with Curriculum 2.0, and post-secondary opportunities including adult day services and employment.

**EMOTIONAL DISABILITIES SERVICES**

Emotional Disabilities Services are provided to students who demonstrate significant social emotional learning, and/or behavioral difficulties that adversely impact their success in school. Students access the MCPS general education curriculum but have difficulty achieving academic success due to emotional and behavioral difficulties that interfere with their ability to participate successfully in an educational environment. Students are served in a continuum of settings that may include self-contained classes and have opportunities for participation in general education classes with nondisabled peers as appropriate.

**BRIDGE SERVICES**

Bridge is a set of services that supports students who demonstrate significant social emotional learning, and/or behavioral challenges that make it difficult to succeed in a large school environment. Many students require social and emotional supports in order to access their academic program. Comprehensive behavior management is utilized in the model that includes proactive teaching and rehearsal of social skills, as well as the use of structured and consistent reinforcement systems. Services are provided in a continuum of settings that may include separate classes and opportunities for participation in general education classes with nondisabled peers as appropriate.

**SERVICES FOR STUDENTS WITH AUTISM SPECTRUM DISORDERS**

The Comprehensive Autism Preschool Program (CAPP) provides highly intensive and individualized services for students ages 3–5. Evidence-based instructional practices are utilized to increase academic, language, social, and adaptive skills to ultimately provide access to a variety of school-aged services and to maximize independence in all domains.

Autism Services for students, elementary through age 21, provide access to Alternate Academic Learning Outcomes aligned with Curriculum 2.0. Students receive Applied Behavior Analysis intensive instruction in a highly-structured setting to improve learning and communication that provides inclusive opportunities with nondisabled peers. At the secondary level, students also receive vocational and community support.

Secondary Autism Resource Services, located in three middle and three high schools, are designed for students with autism spectrum disorders who are diploma bound and have difficulty mastering grade-level curriculum. The students require a modified pace and individual accommodations representative of the needs and characteristics of students with autism spectrum disorders. Students receive instruction in the general education curriculum with the supports indicated on their IEPs. Access to the general education curriculum with enrichment is reinforced.

PROGRAMS AND SERVICES LOCATIONS FOR SPECIAL EDUCATION STUDENTS 2017-2018

**TRANSITION SERVICES**

Transition services are provided to students receiving special education, age 14 or older, to facilitate a smooth transition from school to postsecondary activities. These activities include, but are not limited to, postsecondary education, workforce, experiences, continuing and adult education, adult services, independent living, and/or community participation. Services are based on the individual student’s needs, considering the student’s strengths, preferences, and interests. Transition services are delivered through direct and/or indirect support coordinated by a transition support teacher.

**SERVICES FOR DEAF AND HARD OF HEARING**

Deaf and Hard of Hearing services provide comprehensive educational supports to students who are deaf or have a significant hearing loss. These services, provided by itinerant teachers, enable students to develop effective language and communication skills necessary to access the general education environment in their neighborhood schools or other assigned schools. Students with more significant needs receive services in special centrally-located classes. Services are provided in three communication options—oral/aural, total communication, and cued speech. Assistive technology and consultation also are provided to students and school staff members.

**SERVICES FOR STUDENTS WITH PHYSICAL DISABILITIES**

Related services of occupational and physical therapy are provided to students with disabilities throughout MCPS in their home or assigned schools. The type and frequency of services provided are based on individual student needs and include direct therapy and consultation to team members. Students with more significant physical needs receive services in one of two county-wide locations.

**SERVICES FOR THE VISUALLY IMPAIRED**

Vision services are provided to students with significant visual impairments or blindness. Services enable students to develop effective compensatory skills and provide them with access to the general education environment.

A prekindergarten class prepares children who are blind or have low vision for entry into kindergarten.

Itinerant vision services are provided to school-aged students in their neighborhood schools or other assigned schools. Skills taught include visual utilization, vision efficiency, reading and writing using Braille, and the use of assistive technology. Students may receive orientation and mobility instruction to help them navigate their environment. Students over the age of 14 receive specialized transition support as appropriate

**SPEECH AND LANGUAGE SERVICES**

Speech and language services diagnose communication disorders and improve spoken language skills; facilitate compensatory skills; and enhance the development of language, vocabulary, and expressive communication skills to support student access to the general education curriculum. The type and frequency of services provided are determined by individual student needs. For students with less intensive needs, educational strategies are provided to the student’s general education teachers and parents for implementation within the classroom and home environments. Students may receive services in their classroom program, in small groups, or individually. Prekindergarten students requiring extensive services attend a class program, two or five days per week.

**AUGMENTATIVE AND ALTERNATIVE COMMUNICATION (AAC) CLASSES**

AAC classrooms provide intensive support for students who are not verbal or have limited speech with severe intelligibility issues. Students learn to use and expand their knowledge of augmentative communication devices and other forms of aided communication in order to access the general education curriculum. Emphasis is on the use of alternative communication systems to enhance language development, vocabulary development, and expressive communication skills. Services and supports are often provided within the general education environment to the greatest extent possible.

**ASSISTIVE TECHNOLOGY SERVICES by The InterACT Team**

Assistive Technology (AT) services by the InterACT Team provide support for students from birth–21. These AT services support students who are severely limited in verbal expression or written communication skills, often due to physical disabilities. Services are provided in the natural environment for children birth to age three, or in the elementary, middle, or high school instructional setting for prekindergarten through age 21.

**PRESCHOOL EDUCATION PROGRAM (PEP)**

PEP offers prekindergarten classes and services for children with disabilities ages 3–5. PEP serves children with delays in multiple developmental domains that impact the child’s ability to learn. Services range from consultative and itinerant services for children in community-based child care settings and preschools to itinerant instruction at home for medically fragile children. Classes are provided for children who need a comprehensive approach to their learning. PEP PILOT provides a two-day per week early childhood setting; PEP collaboration classes offer inclusive opportunities for prekindergarten students using a coteaching model. PEP Classic and Intensive Needs Classes serve children with developmental delays in a structured, special education setting. PEP 5 hour class serves students with moderate to severe delays and/or multiple disabilities.

## PROGRAMS AND SERVICES LOCATIONS FOR SPECIAL EDUCATION STUDENTS 2017-2018

### Infants and Toddlers

Montgomery County Infants and Toddlers Programs (MCITP) offers early intervention services to assist families with their efforts to address their children's developmental and special needs. MCITP serves families with children between birth and the start of the school year following the fourth birthday. Upon eligibility assessment each family is assigned to one of MCITP's five regional sites in Montgomery County. Then each family works with a team to define the priorities, learn about available resources and discuss the child's strengths and needs. You and your team will identify what you want for your child and how everyone will work together to achieve your family goals.

Early intervention services are provided in the child's natural environment (home and community settings where a child is during the day). Services are based on each individual child's and family's needs and may include services such as special instruction, speech/language therapy, occupational and physical therapy, and family counseling. A family coaching model is used in MCITP.

PROGRAMS AND SERVICES LOCATIONS FOR SPECIAL EDUCATION STUDENTS 2017-2018

<b>SPECIAL SCHOOLS AND PROGRAMS</b>
<p><b>Longview School (Age 5–21)</b> Longview School, collocated with Spark M. Matsunaga Elementary School, serves students age five to 21 with severe to profound intellectual disabilities and multiple disabilities. Alternate Learning Outcomes aligned with Curriculum 2.0 are utilized to provide students with skills in the areas of communication, mobility, self-help, functional academics, and career/community readiness.</p>
<p><b>RICA (1–12)</b> The John A. Gildner Regional Institute for Children and Adolescents (RICA), in collaboration with the Maryland State Department of Health and Mental Hygiene, provides appropriate educational and treatment services to all students and their families through highly-structured, intensive special education services with therapy integrated in a day and residential treatment facility. An interdisciplinary treatment team, consisting of school, clinical, residential and related service providers develops the student’s total educational plan and monitors progress. Consulting psychiatrists, a full time pediatrician, and a school community health nurse also are on staff. RICA offers fully-accredited special education services which emphasize rigorous academic and vocational/occupational opportunities; day and residential treatment; and individual, group, and family therapy. The RICA program promotes acquisition of grade and age-appropriate social and emotional skills and allows students to access the general education curriculum.</p>
<p><b>Carl Sandburg Learning Center (K–5)</b> Carl Sandburg Learning Center is a special education school that serves students with multiple disabilities in kindergarten through Grade 5, including intellectual disabilities, autism spectrum disorders, language disabilities, and emotional and other learning disabilities. Services are designed for elementary students who need a highly-structured setting, small student-to-teacher ratio, and access to the MCPS general education curriculum or Alternate Learning Outcomes aligned with Curriculum 2.0. Modification of curriculum materials and instructional strategies, based on students’ needs, is the basis of all instruction. Emphasis is placed on the development of language, academic, and social skills provided through an in class trans-disciplinary model of service delivery in which all staff members implement the recommendations of related service providers. Special emphasis is placed on meeting the sensory and motor needs of students in their classroom setting. To address behavioral goals, services may include a behavior management system, psychological consultation, and crisis intervention.</p>
<p><b>Stephen Knolls School (Age 5–21)</b> Stephen Knolls School services students, ages 5–21, with severe to profound intellectual disabilities and multiple disabilities. Alternate Learning Outcomes aligned with Curriculum 2.0 are utilized to provide students with skills in the areas of communication, mobility, self-help, functional academics, and career/community readiness.</p>

PROGRAMS AND SERVICES LOCATIONS FOR SPECIAL EDUCATION STUDENTS 2017-2018

**Rock Terrace School (6–12)**

Rock Terrace School is comprised of a middle school, a high school, and an upper school that implement school-to-work programs. The instructional focus of the middle school is the implementation of Alternate Learning Outcomes aligned with Curriculum 2.0 to prepare the students for transition to the high school program. The high school program emphasizes Alternate Learning Outcomes aligned with Curriculum 2.0 and community-based instruction activities that enable students to demonstrate skills that lead to full participation in the school-to-work plan and vocational/community experiences. Authentic jobs help in reinforcing classroom learning. The upper school prepares students for post-secondary experiences and career, college, and career/community readiness.
