Suburban Hospital’s Medical Exploring Program

A unique opportunity for high school students to explore the field of health and medicine

In a community hospital setting, high school students can learn about medical care from the region’s top physicians, surgeons, and healthcare professionals and tour key hospital departments, including the Emergency Department. Students can also participate in community healthcare events and earn student service hours.

The program will be held up to three times a month on Monday evenings from 6:00pm to 7:15/30pm.

Some of the activities may include:

- Suturing demonstration and practice
- Tour of the ER/HeliPad/Trauma Room
- Field trips to area medical facilities
- Presentations by the region’s top physicians, nurses, surgeons, and health care professionals

The Medical Exploring Program is sponsored by the Suburban Hospital Community Health and Wellness Department in partnership with the Boys Scouts of America. Interested students must register for the program and complete an application. The cost is $100 for returning members and $125 for new members. Parents are encouraged to attend selected sessions and may be needed to chaperone on field trips.
