

INTRODUCTION

The MCPS Course Bulletin is available to you at www.mcps.k12.md.us/curriculum/coursebulletin/ for your information and to assist you in selecting your courses. Please examine the Course Bulletin as well as this booklet. Each contains important information about graduation requirements and your child's high school program.

Although the MCPS Course Bulletin contains hundreds of possible courses, please note that not all courses are offered each semester at each school. This booklet contains listings of classes that are offered at Albert Einstein High School and the Thomas Edison High School of Technology.

Students will need to list 14 courses on the course registration card, seven each semester, for a full academic program. It is very important that course selections are accurate and that alternates are provided since staffing is based upon students' selections. Parents are required to sign the registration card before their child begins the registration process.

Also contained in this booklet is a brief description of the specialized programs, Academy Programs & Pathways at Einstein High School. Please carefully review the spread sheets of course selections and note *course fees, prerequisites, and other pertinent information before choosing classes. Recommended Academy Pathways need to be followed as written. Not following the pathway may result in student not meeting graduation requirements and/or not completing the desired academy program. If you have any questions concerning course selections, contact your child's counselor at 301-929-2220.

*Course fees may be waived for students who are on free and reduced lunch (FARMS) or who demonstrate financial need.
