

# Highland View ES

## Family Math Night

By Sherri Stevens, Math Content Coach

Math Night was an exciting event for Highland View Elementary. Many families participated with various math games for every grade level. After the games were demonstrated by the classroom teachers, the parents played the math games with their children. Every child was able to take home math kits to reinforce the math concepts at home.

This event promoted parental involvement and integrated fun opportunities for learning different math strategies. Thanks to all of our dedicated teachers, Math Night was a big success!
