Everything you always to know about the new

**WEB 2.0:** The term Web 2.0 is commonly associated with web applications that facilitate interactive information sharing, interoperability, user-centered design, and collaboration on the World Wide Web. A Web 2.0 site gives its users the free choice to interact or collaborate with each other in a social media dialogue as creators (prosumer) of user-generated content in a virtual community. Examples of Web 2.0 include social-networking sites, blogs, wikis, video-sharing sites, hosted services, web applications, mashups and folksonomies; also referred to as the 'Read/Write Web.

One of the most comprehensive compilations of WEB 2.0 applications and e-resources for educators:
