

May 26, 2026

Dear White Oak MS Community,

As part of the Montgomery County Public Schools (MCPS) Drinking Water Testing Program, testing has been completed at your school. Test results indicate that all drinking water outlets were below the Maryland Department of the Environment Action Level, and no further action is required.

Attached is the drinking water testing report with results for your school, which contains information about the health effects associated with exposure to lead. The school's drinking water testing history and translated versions of the health effects of lead are available on the MCPS Drinking Water Testing Program website at the following link:

<https://www.montgomeryschoolsmd.org/departments/facilities/sustainability/drinking-water-results/>

If you have questions, please contact me via email at Brian_A_Mullikin@mcpsmd.org or 240-740-2324.

Sincerely,

Brian Mullikin
Environmental Team Leader
