

Response received from MCPS Administration

The PreK-12 mathematics team has been hosting a series of community meetings. They are advertised through Five Things to Know and school announcements. Resources and recordings can be found on the MCPS Mathematics webpage. As the state shares more documentation and guidelines, the resources are updated. The next virtual community webinar is scheduled for April 16, 2026. As decisions are made locally about curricular products and materials those will be shared, as well.
