Are there other high-demand courses that are being considered for a transition to a virtual format?

The following chart highlights the courses with the highest enrollment, along with their perspective pass rates. With the exception of English for English Language Learner courses, all courses
are available for virtual delivery.

Health Education courses enroll the largest number of students and maintain exceptionally strong pass rates. In contrast, core math (Algebra 1, Geometry) and English courses (English 9/10) have pass rates clustered between 50% and 60%, suggesting a potential need for targeted instructional supports.

The data also indicate that student outcomes are stronger for in-person settings. Expanding virtual options likely would shift more students into a delivery model associated with reduced pass rates. This shift unintentionally could limit access to in-person courses, where we have observed more favorable academic outcomes.

Course	Total Enrollment	Pass Rate
Honors Health Education B	1,604	90.3%
Honors Health Education A	1,526	92.9%
Honors English 9B	657	50.8%
Honors Geometry B	585	75.4%
Honors English 10B	554	58.5%
Honors US History B	537	52.3%
Algebra 1B	522	58.0%
Honors English 9A	486	60.9%
Honors Geometry A	461	75.5%
Geometry B	455	58.2%
Algebra 1A	426	58.2%

Honors US History A	384	57.0%
Foundations of Computer Science B	164	79.9%
Foundations of Engineering and Technology B	151	76.2%
Foundations of Computer Science A	127	89.8%
Foundations of Engineering and Technology A	123	82.9%
