

Is your school ready to make a difference?
Let's do

3 Green Things

Commit to three classroom actions, assign the roles to students, and help your school save energy and increase recycling participation. Assigning the roles described below will help us save the environment and keep within our MCPS budget while providing leadership opportunities for our students. Help teach students that their actions make a difference!

Assign a student to make sure all lights are turned off each time the class exits the room.

Light Leader

Assign a student to monitor the recycling and trash bins to make sure everyone is using them properly. See the recycling [flyer](#).

Recycling Ranger

Assign a student to announce an energy or recycling fun fact to the class each morning. Awareness helps MCPS save energy systemwide!

Fact Finder

Assign a student to make sure classroom doors are closed. This helps maintain proper temperatures and reduces our energy costs. See the [flyer](#) about closing windows and doors.

Door Diplomat

Assign a student to close the windows and blinds at the end of the day. See the [flyer](#) about closing blinds.

Window Watcher

Assign a student to shut down classroom computers at the end of the school day. Don't forget the media center and computer labs!

Computer Captain

Remember to complete the [Three Green Things Classroom Commitment](#) and post it in your room. Sustainability and Compliance Team staff would love to know if you're using other strategies for conservation. Share your success stories by emailing: sustainability@mcpsmd.org or calling 240-740-3210 to speak to a staff member.

Thank you for your continued commitment to environmental sustainability!
