

How can you help MCPS  
save **\$24,000** a month?

Turn off **computers** and **individual printers\*** at  
the end of the academic day (when possible).

\*never turn off  
network printers.

If approximately  
half of all MCPS  
computers are  
manually shut down  
at the end of the  
academic day  
versus awaiting the  
automated shut  
down we can save  
~\$24,000 in energy  
costs per month.

SERT Program  
45 W. Gude Drive, Suite 4000  
Rockville, Maryland 20850  
Phone-240-314-1090 or  
SERT@mcpsmd.org

Please remember to  
turn off any  
**individual** printers,  
scanners, etc. when  
not in use.

\* Please remember never to unplug MCPS computers or turn them off via power strips.  
Disconnecting the power source will prevent computers from receiving necessary updates.  
We cannot wake them up if they have no access to power..
