

# Sustainability and Compliance Team

## REFRIGERATOR DAILY TEMPERATURE CHART

School \_\_\_\_\_ Location \_\_\_\_\_

Month/Year \_\_\_\_\_

Refrigerator temperature should  
be between (32°-41°F)

If temperature is above 41°F the Building Service Supervisor  
or Food Recovery Coordinators must dispose of all food and  
inform the Sustainability and Compliance.

| DAY | AM<br>TIME | AM<br>TEMP | INITIALS | CORRECTIVE<br>ACTION |
|-----|------------|------------|----------|----------------------|
| 1   |            |            |          |                      |
| 2   |            |            |          |                      |
| 3   |            |            |          |                      |
| 4   |            |            |          |                      |
| 5   |            |            |          |                      |
| 6   |            |            |          |                      |
| 7   |            |            |          |                      |
| 8   |            |            |          |                      |
| 9   |            |            |          |                      |
| 10  |            |            |          |                      |
| 11  |            |            |          |                      |
| 12  |            |            |          |                      |
| 13  |            |            |          |                      |
| 14  |            |            |          |                      |
| 15  |            |            |          |                      |
| 16  |            |            |          |                      |
| 17  |            |            |          |                      |
| 18  |            |            |          |                      |
| 19  |            |            |          |                      |
| 20  |            |            |          |                      |
| 21  |            |            |          |                      |
| 22  |            |            |          |                      |
| 23  |            |            |          |                      |
| 24  |            |            |          |                      |
| 25  |            |            |          |                      |
| 26  |            |            |          |                      |
| 27  |            |            |          |                      |
| 28  |            |            |          |                      |
| 29  |            |            |          |                      |
| 30  |            |            |          |                      |
| 31  |            |            |          |                      |

• Use Action column to indicate corrective steps taken if temperatures are not in proper ranges.
