

## Session 7 Learn: Outreach within Your School Community

**Learn:** This session, you'll begin to talk about how the UDL teams can establish themselves as leaders in UDL within your schools. What do you need to know about how to create change within a school building? What mechanisms will work best for that outreach?

In this section, you will view two PowerPoint presentations. You will learn about research that informs best practices on technology integration as well as a framework for viewing the role of an instructional coach.

- [Research Informing Technology Integration \(PowerPoint Show\)](#)
- [Coaching Conversations \(PowerPoint Show\)](#)

## Session 7 Discuss: Outreach within Your School Community

### Moving the School Forward with UDL

#### Reflection and Discussion:

*Based on what you read in the "summary of research," what do you think would be the most effective way to move your school forward in UDL implementation? What could your team do to facilitate this? How would the coaching skills in "coaching conversations" help you to create structures in your school to get buy-in for UDL?*

#### Responses to Colleagues:

*In your responses to colleagues, be sure to focus your reply on extending or deepening the conversation.*
