

Safe Route to School Walkability Survey

We want your feedback!

The Montgomery County Department of Transportation wants to make sure you can get to school safely!

MCDOT is conducting walkability studies at 15 Montgomery County public schools and is requesting parents and guardians whose kids attend these schools to participate in this survey. This survey will help MCDOT understand the safety needs and concerns of parents and students as they walk/roll, bike, or scooter to school. **If your child walks/rolls/bikes/scooters to school, please fill out this survey.**

We want to know things like:

- Where new sidewalks may be needed
- Safety hazards
- Possible safety improvements

Help us make your child's path to school safer! Scan the QR code to take the survey!
