

Help your child join the

Club

By the end of the year, your child will need to be able to count to 100. Counting that high can seem like a **MONSTROUS** task, but by making it part of your every day routine, they will be counting to 100 before you know it!!! I have listed some ideas that can make counting fun.

- Throw a ball back and forth while counting.
- Have them count cars or signs on the road.
- Take turns saying the next number. You start with "1" and your child says "2." Go back and forth until you get to 100!
- Have them count during a commercial to see how long until their show comes back on.

If they get stuck on a number, help them out and then have them keep counting! Practice makes perfect !!!
