Marking Period 4, Part 1

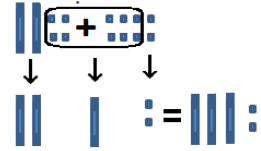

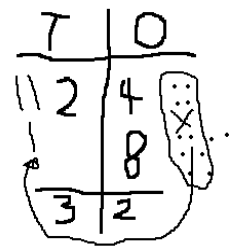

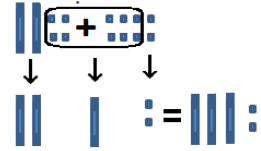

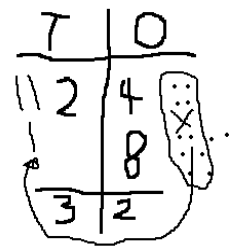

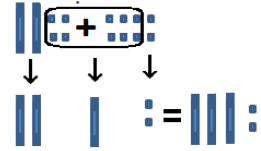

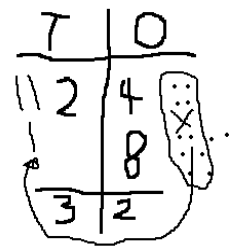

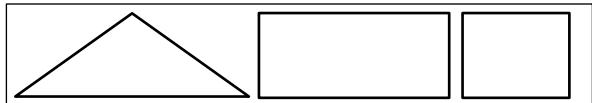

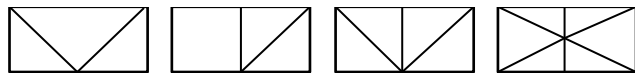

MT	Learning Goals by Measurement Topic (MT) <u>Students will be able to . . .</u>
Number and Operations in Base Ten	<ul style="list-style-type: none"> use written methods that relate to place-value models when asked to: <ul style="list-style-type: none"> add a 2-digit number to a 2-digit number ending in 0. subtract 2-digit numbers ending in 0. add a 1-digit number and a 2-digit number ending in 0.
Geometry	<ul style="list-style-type: none"> identify, describe, and compare 2-dimensional and 3-dimensional shapes by their attributes. compose (put together) 2-dimensional shapes. compose (put together) 3-dimensional shapes. <div> <div> <p>attributes of 2-dimensional shapes</p>  </div> <div> <p>attributes of 3-dimensional shapes</p>  </div> </div>

Thinking and Academic Success Skills (TASS)		
	<u>It is . . .</u>	<u>In mathematics, students will . . .</u>
Originality	creating ideas and solutions that are novel or unique to the individual, group, or situation. 	<ul style="list-style-type: none"> solve 2-digit addition and subtraction problems in new ways using models and written methods. develop a variety of written models to solve 2-digit addition and subtraction problems. use 2-dimensional shapes to create composite shapes. use 3-dimensional shapes to create composite shapes. <div> <p>A composite shape is an object made up of two or more basic shapes.</p> </div>
Metacognition	knowing and being aware of one's own thinking and having the ability to monitor and evaluate one's own thinking.	<ul style="list-style-type: none"> self-monitor (check for understanding) when solving 2-digit addition problems by reflecting on strategies and applying new thinking when necessary. explain the thinking process used when sorting shapes by attributes.
