Marking Period 2, Part 2

## Learning Experiences by Measurement Topic (MT)

| MT | - |  |
| :---: | :---: | :---: |
|  | - practice adding and subtracting by playing math games. <br> - write equations with a symbol to represent the unknown (a missing number) when solving word problems. |  |
|  | Examples of Problem Solving Strategies |  |
|  | counting on/back | making a ten |
|  | $8+3=\square$ Say 8 . Then say the next three numbers. The sum (the number resulting from adding numbers) is 11 . <br> 11-3= $\square$ Say 11. Then say the three numbers that come before 11. The difference (the number resulting from subtracting numbers) is 8 . | A strategy in which students add two numbers to make a sum of 10 . |
| - | drawing a picture |  |
|  | Two bunnies sat on the grass. Three more bunnies hopped there. How many bunnies are on the grass now? <br> Equation: $\square=2+3$ Answer: 5 bunnies <br> Five apples were on the table. I ate two apples. How many apples are on the table now? <br> Equation: 5-2 = $\square \quad$ Answer: 3 apples |  |

- add three whole numbers with a sum less than 20 by using objects, drawings, and equations.
- identify three possible addends for a given sum.

For example: $10=\square+\square+\square$ One possible answer: $10=3+2+5$

- play an addition game to practice adding. Collect a small pile of objects (cereal, pennies, toys, etc.). Split the objects into three groups. Say or write an equation to represent the groupings of objects. For example, "I have 16 beans. I can split the beans into groups of 5, 7, and 4. So, 5+7+4=16." Put the piles back together and split the objects again in a different way. Repeat until all possible combinations are found.
- practice making 10.

| Ways to Make 10 |  |
| :--- | :--- |
| $0+10=10$ | $6+4=10$ |
| $1+9=10$ | $7+3=10$ |
| $2+8=10$ | $8+2=10$ |
| $3+7=10$ | $9+1=10$ |
| $4+6=10$ | $10+0=10$ |
| $5+5=10$ |  |

- create and solve addition and subtraction word problems about personal interests or everyday life. For example, "I had 8 chicken nuggets on my plate. I ate some and now I have 4 left. How many chicken nuggets did I eat?"
- take an intellectual risk by practicing multiple ways to make the same sum using three addends on an online resource:
