

The Science Share is Coming!

Dear Wayside Families,

We are very excited to present *The Wayside Science Share*, a non-competitive, voluntary event where students are encouraged to share their ideas, projects and inventions. The *Wayside Science Share* will be held on **June 3, 2014**. Student projects will be displayed throughout the school during the day and will be open to Wayside families from 6:00pm – 7:30pm that evening.

Attached are the Wayside Science Registration Form, Science Share Procedures and Guidelines, Scientific Method Form, and a Volunteer Form to fill out if you'd like to assist with various jobs the day of the Science Share. Please have students submit their registration forms to their teacher **no later than Friday, April 11th**.

On the back of the registration form is a feedback form that your child's teacher will fill out and give back to you. This form will let you know if your project was approved or if you need to make any corrections.

While parental support is critical in this effort, please encourage student independence. All projects should be done at home. Parental help, such as construction requiring tools, is permissible. Parents should:

- Give moral support; give encouragement when things seem to be right.
- Help your child gather all materials needed for their project.
- Help your child saw a piece of wood, bend wire, put duct tape on the poster, cut the cardboard, help with lettering and spelling.
- Help your child with ideas on where to find information that pertains to their project on the internet or in the library.
- Beware of using expensive and/or movable equipment.

Wayside Elementary will not be responsible for losses! Exhibitor must assume all risks as to damage of his/her project or parts thereon.

If you have any questions, please contact:

Mrs. Lori Ugolini, Lori_A_Ugolini@mcpsmd.org

Happy experimenting!
