Incoming Magnet Precalculus / Functions Summer Review Assignment

Students,

This assignment should serve as a review of the Algebra and Geometry skills necessary for success in Magnet Precalculus or Magnet Functions. Our hope is that this review will keep your mind mathematically active during the summer and prepare you for the fun and challenging year ahead. Because of the diverse backgrounds of the students coming into the magnet program some of the problems may be more challenging than others. We expect that you will be able to do any of these problems. **This assignment will not be collected or graded, however any of these problems may turn up on tests and quizzes.** Don't do the problems that feel like "busy-work" to you but focus on those that you find more difficult. Enjoy your summer. See you in August ready to learn!!!

Directions:

- Answer questions on a separate sheet of paper.
- Show all work neatly and well organized.
- Carefully and neatly label your problems and solutions, including the original problem.
