

# STUDY TIPS

**So, either it's time to study for a unit test, time to study for the big exam, or even just time to do the homework. What should you do?**

1. LOOK AT THE OBJECTIVE SHEET.

For each unit, we give you the objectives for the unit and the pages in the textbook to read. You should read over the objectives to see what we expect you to know and be able to do at the end of the unit.

2. READ THE CHAPTER AND TAKE NOTES.

Keeping those objectives in mind, read the assigned pages and take notes in outline form.

3. TAKE NOTES IN CLASS

Listen in class, take more notes, refer to your class notes, and ask questions!

4. SCAN THE CHAPTER AGAIN, LOOKING AT THE POINTS TALKED ABOUT IN CLASS IN MORE DETAIL.

Especially look at all the **DIAGRAMS!**

5. Read the relevant pages in your biozone book and answer the questions.

6. practice the multiple choice questions at the end of the chapter.

7. Read through all your notes. Highlight parts that you are unsure of and get help!

[Call a friend, come to see your teacher at lunch, form a study group.](#)
