DUAL ENROLLMENT COLLEGIATE OPTIONS

Students may access any of our dual enrollment (DE) options by enrolling in approved college courses offered on the college campus, in their high school building, and/or online. Students may participate in general course options, or in a DE program that allows them to earn an associate degree prior to high school graduation. While a course is in progress, it does not appear on the high school transcript. Upon completion of the course and the college grade data transfer process, the transcript is updated to reflect the official college course title for Dual Credit. All college courses are advanced level and carry quality points which is calculated into the student's high school weighted GPA.

Grade Calculations for Secondary Courses:

A new final grade calculation will be implemented for all students in Grades 6–12. Beginning school year 2025–2026, the final course grade is determined by calculating the average of the numeric grades from each marking period. Montgomery County Public Schools will be requiring summative semester exams in some core courses. Teachers will no longer use grade calculation charts to determine the final letter grade. For semester-long courses: the final grade is the average of the two marking period grades, calculated by adding the numeric grades from both marking periods and dividing the sum by two. High School courses taken in middle school are only included in the GPA if it improves the overall GPA. Changes to the Grading and Reporting Regulation are designed to increase consistency, strengthen expectations for student learning, and accountability across schools.
