

MATHCOUNTS Club at Cabin John MS: Frequently Asked Questions

August 24, 2021

1. What is Mathcounts Competition Series?

Mathcounts Competition Series is the nation's premier middle school math competition consisting of a series of competition. This school year the series has been modified due to the pandemic. See <https://www.mathcounts.org/programs/competition-rules-faq> for more information.

2. How do the CJMS Mathcounts Club and Team work?

Several CJMS parents started the Mathcounts Club for the first time at CJMS during the 2018-2019 school year, with substantial support from many parent volunteers, CJMS staff and PTSA board members. Six of the ten team members qualified for the Maryland State Mathcounts competition, an outstanding performance for a first-time participant. For the 2019-2020 school year, State level competition was cancelled. Our school team ranked 4th in the Chapter level competition, with two students placed in the top 10%.

What is more important, we have fostered interest in math in CJMS students. Many students have sought out additional math learning and contests beyond Mathcounts.

The parent steering committee will continue to coordinate the process. As some of our beloved student coaches have moved onto colleges, we will have three coaches from the last year continue to coach our students this year, and we will likely recruit a couple of previous Club members who just moved to 9th grade as our new coaches.

This year we will try to go back to in person if condition allows. Below is a tentative outline of what to expect. Note that things are subject to change.

- Tryout. Here is the [link](#) to Google form for signing up for the tryout. About 24 students with the highest scores will qualify for the Mathcounts Club. Details will be provided in the Google form. We have a **tentative test date of 9/24, Friday starting at 3:10 pm. in cafeteria.**
- Club training, team formation, and competition. Club members will meet weekly on Sundays 9-11pm for training and testing. The performance in these tests will form the basis for the coaches to select 12 members, out of the ~24 Mathcounts Club members, to form the CJMS Mathcounts Team. Competition schedule for the Mathcounts series can be found at

<https://www.mathcounts.org/programs/critical-dates>

3. How can I prepare for the tryout?

Tryout problems will be similar in difficulty level to past Mathcounts competition problems in the School Competition component. See

<https://www.mathcounts.org/sites/default/files/2020%20School%20Competition%20Sprint%20Round.pdf> for the 2020 Mathcounts School Competition problems.

4. CJMS also has a school math team, how does it relate to the Mathcounts club and team?

The Mathcounts club/team is independent of the School Math Team. For information on the School Math Team, please refer to its information on the CJMS website.

5. What are some resources and opportunities to advance students' math skills if they do not qualify into the Mathcounts club and team?

There are many free online resources for students to practice and improve their math skills, including some listed on the mathcounts.org website. In addition, there are many math competitions that welcome any student to participate. These competitions often rely on parent and community volunteers. In the last few years, several parents took our students to several different math competitions and took home trophies. We often receive information on such competitions, but don't have the resources to coordinate. If there are parents who are interested in coordinating these competitions, please let us know. Be forewarned that it might require a substantial amount of effort and time.

6. Who can I contact if I have questions?

Hopefully this FAQ is self-explanatory. To ensure equal access to information, we will announce tryout signup through CJMS or PTSA channels. After that time, we will start monitoring the cabinjohnmathcounts@gmail.com email account regularly until the team has been formed, after which time communication would be mainly through team email list and Google classroom, and this email account will not be monitored routinely.
