# Internal Style Sheet

- Define your styles in the actual html page

- Only applies to that page

- (this is just 1 of 3 options – see others later)

Where does the CSS go?

```
<title>HTML5 Skeleton</title>

<style>

    h2{
        color: #f00;
        font-size: 150%;
    }

</style>

</head>
<body>
```

- <head> section

- After the meta tags

- Between two <style> tags

- Define as many style rules there as you need
