

The Career Key™

The Career Key is based on John Holland's theory of vocational choice. At its simplest, this theory proposes that "Birds of the same feather flock together." In other words, people like to be around others who have similar personalities. In choosing a career, it means that people choose jobs where they can be around other people who are like them.

It is the best known and most widely researched theory on this topic. It is used by most career counselors. Understanding it will help you make sense of your Career Key scores and how they relate to job success and satisfaction.

Results

The Career Key measures how similar you are to six basic types of people.

1. Realistic
2. Investigative
3. Artistic
4. Social
5. Enterprising
6. Conventional

The higher your score, the more you are like that type. For example, if your highest score is on the "Artistic" scale, that means you are most like the Artistic personality type.

Generally, you will be happiest in a job that matches your personality type. It is a good idea to look at the jobs listed for the two or three personality types that you have the highest scores.

Realistic

- Likes to work with animals, tools, or machines; generally avoids social activities like teaching, healing, and informing others;
- Has good skills in working with tools, mechanical or electrical drawings, machines, or plants and animals;
- Values practical things you can see, touch, and use like plants and animals, tools, equipment, or machines; and
- Sees self as practical, mechanical, and realistic
- Persons having a Realistic personality type "dominate" this environment. There are more of them than there are people of other personality types. For example, at a construction site there will be more persons having a "Realistic" personality than there will be people who have a Social or Artistic type.
- "Realistic" people create a "Realistic" environment. For example, they particularly value people who are practical and mechanical -- who are good at working with tools, mechanical or electrical drawings, machines, or animals.

Examples of occupations that have a Realistic environment are:

Farmer	Forester	Fire Fighter
Police Officer	Flight Engineer	Pilot
Carpenter	Electrician	Diesel Mechanic
Locomotive Engineer	Truck Driver	Locksmith

The two work environments that are closest to the Realistic type are Conventional and Investigative. The farthest away is the Social type.

Investigative

- Likes to study and solve math or science problems; generally avoids leading, selling, or persuading people;
- Is good at understanding and solving science and math problems;
- Values science; and
- Sees self as precise, scientific, and intellectual.
- Persons having an Investigative personality type "dominate" this environment. There are more of them than there are people of other personality types. For example, in a scientific laboratory there will be more persons having an "Investigative" personality than there will be people who have an Enterprising type.
- "Investigative" people create a "Investigative" environment. For example, they particularly value people who are precise, scientific, and intellectual -- who are good at understanding and solving science and math problems.

Examples of occupations that have an Investigative environment are:

Chemist	Mathematician	Meteorologist
Biologist	Dentist	Physician
Veterinarian	Pharmacist	Medical Technician
