

A Huge Thank You for all of our Virtual Collaborators

Early in 2020, our nation and schools were flipped upside down as the Covid-19 pandemic thrust all into a position not seen before in modern times. As a district we were forced to approach teaching and learning in an entirely new direction as we had to transition our entire curricular program into a virtual platform and recreate the student engagement our students experience in person in our classrooms in this virtual world. In order to do so, the Pre K-12 team relied upon a group of incredible teachers who volunteered their time to write, review, and publish new content, all while continuing to perform their own teaching duties and support their students, families, colleagues, and friends. We want to take a moment to say thank you to all of these dedicated staff members, many of which continue to support the creation of new materials for use in our ‘classrooms’ as we progress into the second half of the school year.
