### Happy Grammar Day

In honor of Grammar Day, we would like to take you away to a warm, breezy summer place on the beach for a few minutes, using anagrams. An anagram is a kind of word play that results from rearranging letters of a word or group of words to produce a new word or a phrase, using all the original letters.

How many of these anagrams can you solve? Share them with your colleagues.

a rag man            [One word. Clue: What this subject is all about]

meet sir mum        [One word. Clue: Time of year]

cab action have     [Two words. Clue: Pack your bikini]

sable lab            [One word. Clue: Summer game of choice]

dean mole            [One word. Clue: Great with ice and a straw]

Answers:

[anagram](#)

[summertime](#)

[beach vacation](#)

[baseball](#)

[lemonade](#)
