

Grease Trap Monthly Maintenance SOP

- **Do not clean grease trap during normal school hours due to odors!**
- Close door to FACS classroom and open the windows
- Remove lid from Schier GB-25 grease interceptor
- Remove top grease layer of the grease interceptor using the ProGuard 20 wet/dry vacuum
- Remove liquid content of the grease interceptor using the wet/dry vacuum until vacuum is full
- Disconnect the hose from wet/dry vacuum and drain into the grease interceptor
- Refill grease interceptor with water by turning on sink connected to the grease interceptor
- Replace lid and seal properly
- Sign and date the record keeping log located in FACS room
- Empty contents of wet/dry vacuum directly into trash room grease interceptor
- Wash out wet/dry vacuum into the trash room grease interceptor

* If trash room does not have a grease interceptor, empty into the trash room floor drain
