

How to Capture Images and Video with the Elmo

Capturing Images:

1. Make sure the Elmo is turned on and connected to the computer. Next, double click the **Image Mate** icon to start the software.

2. **The Image Mate** menu as well as the Live Image window displaying the object beneath the Elmo will open.

3. To capture a still image, click on the **Capture** icon from the **Image Mate** menu.

4. Below the captured image, a menu of icons will appear. These icons allow you to draw on the image, rotate it, save it, and zoom in and out.

5. To save the image, select the **Save** or **Save As** icon. Browse to the desired location for saving from the **Save As** dialogue box. Press **Save** when done. The picture will be saved as a **.jpg** and can be uploaded to a website or inserted into other software applications.

6. To go back to the live view of the object under the Elmo, choose the **Live Image Icon**.

Capturing Video:

1. To capture a video, click on the **Recording Tools** icon from the **Image Mate** menu.

2. A dialogue box will open that will allow you to start recording. Press the **Start Recording** button to start. In order to record sound, you must attach a microphone to the computer.

3. Browse to the desired location for saving from the **Save As** dialogue box. Press **Save** when done. Recording will start immediately.
4. When done press the **Stop Recording** button.
5. The video will be saved as an **.avi** file in the specified location and can be viewed or inserted into other software applications.
